TOTAL	1,828	1,972	11,581

The Colas Group's consolidated revenue at the end of March 2010 totaled 1.828 billion euros, compared to 1.972 billion euros at the end of March 2009, a 7.3% decrease (-7.7% with comparable exchange rates and scope of business). A breakdown of these figures shows that France accounted for 1.223 billion euros (-5.9%) and the international units for 605 million euros (-10.1%).

Business was put at a sharp disadvantage by very harsh winter weather in France (especially in January and February), Europe and North America. Climate conditions were even worse than those recorded during the 1<sup>st</sup> quarter 2009.

It is important to underline that 1<sup>st</sup> quarter activity is not highly significant, due to the strong seasonal nature of the majority of Colas' businesses.

Work-on-hand remains high at the end of March 2010 with 7.0 billion euros, slightly more than the 6.7 billion euros recorded at the end of March 2009.
