PRESS RELEASE

United Anodisers increases prices for continuous coil anodising with effect from 1st January 2011

Brussels, November 23th, 2010 (7:00 am) - United Anodisers, the world leader for aluminium anodising, today announced the next increase in prices for continuous coil anodising of flat rolled aluminium.

The prices will increase between 10-15% with effect from 1st January 2011. It will be applicable to European producers of flat rolled aluminium. This will result in a modest increase in prices to metal distributors.

About UNITED ANODISERS

United Anodisers, the Belgian Group listed on NYSE Euronext Paris Compartment C since June 26th, 1996, is the world's largest architectural and industrial anodiser, specialising in the surface treatment of aluminium extrusions, castings and flat-rolled products.

Anodising is an electrochemical process - electrolysis - that develops a natural and protective exterior layer on aluminium that can be coloured, providing exceptional corrosion protection and/or increased functionality for the metal.

Anodising preserves all the natural and ecological properties of aluminium - it retains its high strength-to-weight ratio, non-magnetic properties and exceptional corrosion resistance without any impact on the total and repeated recyclability of the metal.

Anodised aluminium is used across a wide range of architectural, designer, industrial and automotive applications.
