CYBERNETIX opens a new subsidiary in Brazil

CYBERNETIX announces the opening of a new subsidiary based in Rio de Janeiro (Botafogo) called CYBERNETIX Produtos e Servicos Ltda ("CYBERNETIX do Brasil"). Following the discovery of new Presalt deepwater fields off the coasts of both states of Rio and São Paulo, Brazil became one of the most important places in the world for the Oil & Gas Exploration and Production. This new subsidiary is in line with the CYBERNETIX Group's strategy which is now a world leader in asset integrity monitoring in the Oil & Gas sector.

The Brazilian subsidiary will support:

- Promotion of permanent solutions in integrity monitoring for offshore and onshore units and also, robotics equipments for inspection, maintenance and repair of offshore and subsea installations,
- Integration or complete manufacturing of equipments in order to guarantee the local content required by Brazilian customers,
- The establishment of partnerships with local research laboratories to adapt its solutions to the specific constraints of targeted environments,
- Associated services to ensure the commissioning and the operations of such equipments

This subsidiary is an important step for the international development of CYBERNETIX activities.

About Cybernetix

Cybernetix is a leading provider of remotely operated or robotic systems for interventions in hostile environments. The group operates in two main markets: Energies – Oil & Gas, Nuclear – for the mother company Cybernetix SA and Industries (via CyXplus subsidiary).

Cybernetix counts 145 employees and has developed a world-class engineering and services expertise in project management, and integration of global solutions, operating in 15 countries.
