The Colas Group's consolidated revenue at the end of March 2011 totaled 2.119 billion euros, compared to 1.828 billion euros at the end of March 2010, a 15.9% increase (+10.2% with comparable exchange rates and scope of business). A breakdown of these figures shows that France accounted for 1.487 billion euros (+21%) and the international units for 632 million euros (+5%).

Business during the first quarter 2011 was boosted by favorable weather in France, contrary to the first quarter 2010.

It is important to underline that 1<sup>st</sup> quarter activity is not highly significant, due to the strong seasonal nature of the majority of Colas' businesses, especially in its international units.

Work-on-hand at the end of March 2011 remains high, at 7.0 billion euros. These figures are identical to work-on-hand at the end of March 2010, in spite of an increase in revenue.
