

CHARGEURS

PRESS RELEASE

Disclosure of a Passive Reduction in Voting Rights

On July 11, 2011, the share capital of Chargeurs increased to €2,098,192.80 divided into 13,113,705 shares following the conversion of convertible bonds requested in June 2011.

As a result, the percentage of voting rights held by Eduardo Malone, Chairman and Chief Executive Officer of Chargeurs, directly and through SOFI EMY, a company controlled by him, declined below the 5% disclosure threshold, SOFI EMY's percentage of the capital and voting rights having fallen below this threshold.

These thresholds were crossed due solely to the capital increase described above.

The total number of shares held by Eduardo Malone remains unchanged at 662,358. Mr. Malone also holds 26,493 convertible bonds.
