Quarterly sales figures on the rise

The turnover for the 3rd quarter 2011/2012 (ended 31/12) amounted to €10.2 million* against €6.8 million over the same period in 2010/2011.

The development of the turnover is due to an intensive business activity, but order taking was down, resulting in a decrease in the order book at 31 December 2011 to €15 million.

However, there are good prospects forecast for the end of the year with a great many contracts being negotiated, particularly in Africa and South America.
