

16 August 2012

Turnover of 1st quarter 2012/2013: Brazil gets its breath back

In thousands of euros	First quarter (30/06)		
	2012/2013	2011/2012	Variation %
Consolidated LPG	6,645*	8,086*	-18%

*Unaudited figures

Note: more than 90% of contracts are concluded in euros.

The activity of the first quarter 2012-2013 (closed at 30 June) amounts to 6.6 million euros as against 8.1 million euros in the first quarter of the previous financial year.

This difference can be explained by a lag in order-taking by the Siraga do Brasil subsidiary, which had to concentrate all its resources in the execution of projects committed to previously and by the postponement of some substantial orders.

Prospects

The marketing of the automatic gas cylinder vending machines is taking off gradually. A large hypermarket chain has ordered a Distri'Gas Vendis and negotiations are underway with many mass distribution chains.

Siraga is listed on Alternext Paris – code ALSIR
Euroclear FR0000060170
