

### **Commissioning of new wind power plant in Adriers (Vienne department)**

Voltalia started operations at its 10MW wind power plant in Adriers on December 3, 2014, right on schedule.

The commissioning of this new plant, whose construction started in 2013, is in line with Voltalia's timing forecasts (see press release dated September 12, 2013 planning a commissioning in Q4 2014) thanks to an excellent management of the construction process.

Voltalia's production capacity in France is now 57.5MW, from all energy sources (wind, solar, hydro and biomass), in Metropolitan France as well as in French Guiana. This is fully in line with Voltalia's growth plan announced at the time of the Euronext IPO in July 2014.

"Thanks to this new plant, Voltalia further increases its installed capacity in France, in accordance with its growth strategy in Metropolitan France as well as in French Guiana", states Sébastien Clerc, Voltalia's CEO.

**Next on the agenda: Q4 2014 and 2014 full-year revenues to be disclosed on February 27, 2015 post trading.**
