| Net income | 2.7 | -0.3 | ns | +3.0 |
| Total comprehensive income | 2.5 | -0.1 | ns | +2.6 |

For the first half of 2016, Netgem reports € 39.1 million in consolidated revenue, +5% compared to the same period in 2015.

Gross profit increases by 26%, reflecting the growing positive impact of the new SaaS business model ("Software as a Service"). It is however important to note that last year H1 gross profit was negatively impacted by the rapid US dollar appreciation.

Current operating income reaches € 3.4 million as operating expenses decrease by € 1.0 million.

Financial income is \leq 1.0 million, of which \leq 0.3 million from investment of the Group's cash balance and \leq 0.7 million from foreign exchange hedging positions on 2016 operations.

After taking into account an income tax expense of € 1.6 million, the Group records a net profit of € 2.7 million (group share) and a total comprehensive income (IFRS) of € 2.5 million.

| € million - Consolidated IFRS | 1st half of 2016 | 1st half of 2015 |

| Operating cash flow (A + B) | -4.0 | -8.4 |
| Cash flow related to financing | -6.0 | -5.8 |
| Net change in cash | -10.0 | -14.2 |

The Group's operations used \in 3.1 million of cash after tax during the first half of 2016. The increase in working capital of \in 7.6 million is mainly due to the use of part of the cash position to provide financing solutions to certain strategic customers.

After taking into account a € 0.9 million investment for the acquisition of operating assets and the € 5.8 million dividend distribution for 2015, the Group's cash balance at end of June 2016 amounted to € 26.3 million, a € 10.0 million decrease compared to the end of year 2015.

Strategy and outlook

First half year activity is the result of the strong commercial performance of Netgem's customers in all geographical markets, as TV services are becoming a strategic activity for operators that have launched such services. Netgem expects this favourable trend to continue in the second half of the year.

The Group continues its share buy back program and now owns about 5.8% of its capital.

Fiber project in France

Netgem announces the project to form a joint-venture with Océinde Group and Caisse des Dépôts ("CDC") aiming to become the reference alternative triple-play operator of Fiber To The Home (FTTH) in the geographical areas in France covered by the *Réseaux d'Initiatives Publiques* ("RIP") financed by public-private partnerships.

Netgem would provide its #TelcoTV technology platform and bring the Videofutur brand and business to the venture. Océinde Group, already a fiber operator, would provide its know-how and platform for IP access and voice services. Netgem and Océinde Group have been partners for several years. CDC would provide part of the financing.

The total investments and contributions by the partners would value the new company to € 21 million. Netgem would be the majority shareholder and M. Mathias Hautefort, currently in charge of the Videofutur business at Netgem, would lead it.

This project remains subject to certain conditions precedent, including the completion of additional due diligence and the approval by the Extraordinary General Meeting of shareholders of Netgem. It is expected to close in Q4 2016.
