

## **LISI awarded dual certification, ISO 14001 and OHSAS 18001, for all its activities**

**Paris, France - 18 April 2018** - Today, LISI SA was awarded ISO 14001 and OHSAS 18001 certification by the General Manager of Bureau Veritas Certification as part of the company's programme for multi-site certification.

Until now, each LISI site was certified individually. Henceforth LISI has single multi-site ISO 14001 (v2015) and OHSAS 18001 (v2007) certification.

The health and safety of employees and environmental protection have always been part of the values and priorities of the LISI group.

The implementation of continuous improvement programmes in those areas with precise targets is the keystone of the commitments of the management of LISI for improving accident prevention and environmental protection in all the entities of the group.

This new single certification is a perfect example of the achievement of its ambitions.

Besides, it is entirely consistent with the LISI HSE Excellence programme, which aims to achieve operational excellence in the field of HSE and which has been initiated by LISI since 2013 in order to organise and share the best practices for continuous improvement and the best operational tools across the group.
