

Infotel wins a major client for Orlando software with American Airlines

Today **Infotel** announces the signing of a multi-year contract for its Orlando software with **American Airlines** group.

Orlando (**O**nline **R**epository for **L**arge and **N**umerous **D**ocuments) is a software solution developed by Infotel to create, view and update the various technical manuals needed to conduct flights and maintain aircraft. The manuals must be viewed quickly, be reliable during flight and must be updated anywhere in the world.

Orlando, which is operated in Cloud mode and can be accessed from the Web with PCs or iOS, Android or Windows mobile devices, has already proved a hit with major airlines such as Air France and aircraft manufacturers like ATR.

The addition of such a top-tier client in the United States paves the way for other contracts currently in the finalisation stage.
