

## Production activities gradually starting up again

One week after the cyberattack on Groupe Beneteau on February 19, the joint efforts by its in-house teams and external IT experts make it possible to envisage gradually starting up production activities again at certain plants from Friday February 26.

The Group is continuing with its investigations in order to find solutions to restore its IT systems to a normal and secure way of operating.

Further information on this subject will be published on Wednesday March 17 when the Group reports its results for FY 2019-20 (16 months) and its outlook for the financial year from January 1 to December 31, 2021.
