PLASTIC OMNIUM FINALIZES ACQUISITION OF VARROC LIGHTING SYSTEMS

Plastic Omnium announces it has completed the acquisition of **Varroc's automotive lighting systems (VLS)** business from Varroc Engineering Limited. The €520 million transaction was adjusted downwards by €80 million to reflect weakened market conditions triggered by inflation and supply chain disruptions. VLS will be consolidated into Plastic Omnium's accounts as of October 7, 2022.

Varroc Lighting Systems, a Tier 1 supplier of automotive lighting systems with sales of approximately €0.8 billion in 2021, will be integrated alongside AMLS into the Group's new Lighting division. The new division generated pro forma sales of approximately €1 billion in 2021 and employs 7,000 people in 11 plants worldwide.

Present throughout the lighting value chain via the combination of VLS and AMLS, Plastic Omnium is now in a position to provide a differentiating offer of connected solutions to meet the growing demand of OEMs for integrated exterior systems, thus increasing content and value per vehicle.

Plastic Omnium has identified levers to drive growth and return VLS to profitability in-line with Group standards within 24 to 36 months. The new Lighting division is targeting economic revenue of €1.5 billion by 2027.

"With this acquisition, Plastic Omnium positions itself as a leading player across the entire lighting value chain with a broad range of products, from components to full headlamps and a balanced geographic footprint in cost-competitive countries. We are now able to provide unique differentiated solutions thanks to synergies between lighting and our front-end module and bumper activities," said Laurent Favre, Chief Executive Officer of Plastic Omnium.

A Webcast will be held on Friday, October 7, 2022 at 8:15 AM (CET).
