

ENTECH finalises a new project with Neoen

- Inauguration of a 5 MWp photovoltaic power plant in Clécy (Normandy)
- New project successfully completed for operator Neoen

Quimper, June 20, 2023 – Entech (FR0014004362 - ALESE), the technology company specialised in smart renewable energy storage and management, announces the inauguration of a ground-mounted photovoltaic power plant for the independent electricity producer Neoen.

Inaugurated this month, the 5 MWp plant will generate almost 6 GWh per year. Built on a former airfield and comprising almost 10,000 photovoltaic modules, it has been contributing to the production of renewable energy on the electricity grid since the beginning of 2023.

Entech managed the entire project, from design to delivery of the plant to Neoen.

"Neoen is delighted to be inaugurating this new solar power plant alongside Entech. We are present throughout the life cycle of our projects and we always seek to surround ourselves with quality EPCs for the construction and long-term maintenance of our photovoltaic parks. As a major player in France's renewable energy sector, we are proud to be working with French manufacturers and contributing to their dynamism," says Guillaume Decaen, Neoen's Development Director for France.

"Entech is delighted to have successfully completed this new project for Neoen, extending our references with France's leading independent producer of exclusively renewable energy. This new and successful collaboration strengthens our partnership and encourages the study of other joint projects," says Christopher Franquet, CEO and founder of Entech.

PRESS RELEASE

About Neoen

Founded in 2008, Neoen is one of the world's leading independent producers of exclusively renewable energy. With proven expertise in solar power, wind power and storage, the company plays an active role in the energy transition by producing competitive, green, local energy on four continents. After a sixfold increase in the last six years, its capacity in operation or under construction now stands at over 6.6 GW.

Neoen's flagship operations are France's most powerful solar farm (300 MWp) in Cestas, Finland's largest wind farm (404 MW) in Mutkalampi, one of the world's most competitive solar plants in Mexico (El Llano, 375 MWp) and two of the world's most powerful large-scale storage plants, both in Australia: Hornsdale Power Reserve (150 MW/193.5 MWh storage capacity) and the Victorian Big Battery (300 MW/450 MWh).

A high-growth company, Neoen is targeting 10 GW in operation or under construction by the end of 2025. Neoen is listed in Compartment A of Euronext's regulated market in Paris (ISIN code: FR0011675362, Ticker: NEOEN) on the SBF 120 and CAC Mid 60 indexes.

About Entech

Faced with the technological challenges posed by the strong growth of new energies within the energy mix, Entech enables the massive integration of renewable energies and access to energy thanks to storage and electrical conversion solutions controlled by intelligent software systems.

Builder of the new energies, Entech develops, builds and operates production plants and storage systems - batteries or hydrogen - on-grid or off-grid. Founded in Quimper in 2016, Entech has already completed more than 250 projects worldwide and today employs 140 people.

Selected in 2021 by "La French Tech" in its Green20 programme and recognised by numerous awards for its capacity to innovate in supporting the energy transition, Entech is committed to acting on a daily basis as a responsible company, not only from an environmental point of view but also from a social and societal one.
