

"Live healthier longer"

Publication of a book on the medicine and science of longevity

Paris (France) and Cambridge (Massachusetts, USA), February 22, 2024 – 07:00am CET – Biophytis SA (Nasdaq CM : BPTS, Euronext Growth Paris : ALBPS), ("Biophytis" or the "Company"), a clinical-stage biotechnology company specialized in the development of therapeutics that are aimed at slowing the degenerative processes associated with aging and improving functional outcomes for patients suffering from age-related diseases, announces the publication of a book written by Stanislas Veillet, CEO and co-founder of the company, together with René Lafont, Professor Emeritus at Sorbonne University and co-founder of Biophytis, and Jean Mariani, Professor and Director of the Charles Foix Longevity Institute, on the theme of "*Healthy aging*".

The title of the book is "*Healthy aging - medicine and science of longevity*", and it addresses key public health issues in the context of a rapidly aging world population. This issue highlights the lack of effective treatment for most age-related diseases and the strong medical need.

It describes the major advances made in recent years in the biology of aging, which now make it possible to foresee the development of new treatments. It presents Biophytis' approach that has notably led to the development of Ruvembri™ in sarcopenia, a disease that affects more than 50 million people worldwide and represents a significant commercial opportunity for the Company.

Far from the transhumanist myth of eliminating aging and death, the aim of this book is to mobilise society so that elderly people can live healthier longer.

This book is published by JDH. The book is in French and an English version will be available soon.

About BIOPHYTIS

Biophytis SA is a clinical-stage biotechnology company specializing in the development of drug candidates for age-related diseases. Sarconeos (BIO101), our lead drug candidate, is a small molecule in development for age-related neuromuscular (sarcopenia and Duchenne muscular dystrophy) and cardiorespiratory (Covid-19) diseases. Promising clinical results were obtained in the treatment of sarcopenia in an international phase 2 study, enabling the launch of a phase 3 study in this indication (SARA project). The safety and efficacy of Sarconeos (BIO101) in the treatment of severe COVID-19 were studied in a positive international phase 2-3 clinical trial (COVA project). A pediatric formulation of Sarconeos (BIO101) is currently being developed for the treatment of Duchenne Muscular Dystrophy (DMD, MYODA project). The company is based in Paris, France, and Cambridge, Massachusetts. The Company's ordinary shares are listed on Euronext Growth (Ticker: ALBPS -ISIN: FR0012816825) and the ADSs (American Depositary Shares) are listed on Nasdaq Capital Market (Ticker BPTS - ISIN: US09076G1040).
