

News release

The SBTi validates Eiffage's short-term and long-term greenhouse gas emission reduction targets for scopes 1, 2 and 3, aligned with the 1.5°C trajectory for all its business lines, as well as the commitment to achieve net-zero by 2050

The SBTi (*Science-Based Targets Initiative*) has validated Eiffage's short-term (2030) and long-term (2050) greenhouse gas emission reduction targets for scopes 1, 2 and 3, considered to be in line with the goals of the Paris Agreement and the 1.5°C trajectory.

The Group is committed to reducing its greenhouse gas emissions across all its businesses and aims to reduce by:

- 46% on scopes 1 and 2 as well as 30% on scope 3 by 2030 (vs. 2019, the reference year).
- 90% for scopes 1, 2 and 3 by 2050 (vs. 2019, the reference year), as well as the commitment to achieve net-zero greenhouse gas emissions across its entire value chain by 2050.

Since 2019, the Group has been fully committed to reducing its CO₂ emissions and confirms its strategy across all its business lines, based on:

- **Reducing its internal footprint** (scopes 1 and 2) by focusing on reducing energy consumption on construction sites and its offices, while continuing to invest in decarbonised equipment, machinery and vehicle fleets.
- **The production of low-carbon offers** (scope 3) designed with our partners and suppliers providing low-carbon offers to integrate "low-carbon" materials, renewable energy production, or energy-efficient buildings, reused and recycled materials.

About Eiffage

Eiffage is one of Europe's leading construction and concessions companies. The Group's activities are organised around the following business lines: construction, real estate and urban development, civil engineering, metal, roads, energy and concessions. Thanks to the experience of more than 78,200 employees, Eiffage generated revenue of €21.8 billion in 2023, of which 31 percent was outside France.

About SBTi

The Science Based Targets initiative (SBTi) is a collaboration between CDP, the United Nations Global Compact (UNGC), the World Resources Institute (WRI), the World Wide Fund for Nature (WWF), and one of the commitments of the We Mean Business coalition. The SBTi defines and promotes best practices in science-based target setting and independently assesses companies' targets.
