

## PRESS RELEASE

### **OVHcloud Managed Rancher Service Now Available, Enabling Application Management on any Cloud platform and at the Edge**

**Roubaix – September 12th 2024** – [OVHcloud](#), a global cloud player and the European Cloud leader, today announces the global availability of its Managed Rancher Service. Adding to a growing Public Cloud portfolio comprised of over 40 products and solutions encompassing a total of 8 different services: security, compute, storage, database, network services, analytics, AI and quantum, the new Managed Rancher Service aims to ushering organizations into the era of Multi Cloud. With organizations now relying on different Clouds (Public, Private, On Premises, etc), OVHcloud acknowledges a new normal providing a managed service offering control, security, productivity all with the benefits of a trusted and reversible cloud with no vendor lock-in.

Last april, the Group first introduced the Beta version of its Managed Rancher Service at KubeCon 2024. Now available, OVHcloud Managed Rancher Service leverages Rancher, the industry leading and most popular orchestration tool in the community, and targets medium-sized and enterprise organizations with multiple clusters or a multi-cloud architecture. The complete Rancher Kubernetes management solution was developed in close partnership with SUSE, to deploy and run Kubernetes anywhere at scale effectively supporting modern app platforms. OVHcloud's Managed Rancher Service unifies Kubernetes clusters to offer consistent operations and workload management, all with enterprise-grade security.

*“We are excited for OVHcloud to be offering SUSE’s Rancher solution to their global customer base. SUSE’s dedication to open source and innovation, coupled with OVHcloud’s extensive reach, will empower businesses and organizations around the world to seamlessly adopt cloud native technologies through Rancher, the most widely adopted open-source enterprise container management platform,”* said Peter Smails, SVP, General Manager, Enterprise Container Management at SUSE.

# PRESS RELEASE

Available from the Public Cloud product portfolio, the Managed Rancher Service offers a fully featured private Rancher deployment providing management and orchestration of Kubernetes clusters on any cloud. Users and management rules can be controlled through a single pane of glass UI with access to an extensible service catalog (observability, service meshes, etc). Rancher's multi-cluster management capabilities enable organizations to easily bring their existing nodes and infrastructure to run on OVHcloud's robust infrastructure. Furthermore, Rancher's multi-tenant architecture, secure authentication options, and comprehensive security policies enhance the overall security and isolation of the container environment.

*"OVHcloud's Managed Rancher Service is a key addition to our Public Cloud addressing customer needs to run their critical workloads on-prem, at the edge, or in any cloud. This new proof point firmly demonstrates our commitment to build an open and reversible cloud, effectively supporting Hybrid Cloud and Multi Cloud use cases,"* said Yaniv Fdida, Chief Product and Technology Officer at OVHcloud.

## Data protection and sustainability

OVHcloud's Managed Rancher Service benefits from OVHcloud's well known expertise in infrastructure, offering a trusted Cloud in environmentally friendly datacenters. With the highest security and data protection standards in the form of ISO 27001 certification and HDS for select services, customers benefit from a trusted cloud. OVHcloud datacenters take advantage of the Group unique industrial model with a watercooling system that contributes in best-in-class PUE/WUE indexes (see more data [here](#)).

## Availability & pricing

OVHcloud's Managed Rancher Service provides a flexible, secure and user-friendly solution for container management leveraging the market leading Kubernetes orchestrator. It is available now globally\* with a pay-as-you-go model. Two subscription plans are available (see detailed pricing [here](#)): OVHcloud Edition to manage OVHcloud hosted Kubernetes and Standard to support Multi Cloud workloads.

\*Excluding the United States

# PRESS RELEASE

## About OVHcloud

OVHcloud is a global cloud player and the leading European cloud provider operating over 450,000 servers within 43 data centers across 4 continents to reach 1,6 million customers in over 140 countries. Spearheading a trusted cloud and pioneering a sustainable cloud with the best performance-price ratio, the Group has been leveraging for over 20 years an integrated model that guarantees total control of its value chain: from the design of its servers to the construction and management of its data centers, including the orchestration of its fiber-optic network. This unique approach enables OVHcloud to independently cover all the uses of its customers so they can seize the benefits of an environmentally conscious model with a frugal use of resources and a carbon footprint reaching the best ratios in the industry. OVHcloud now offers customers the latest-generation solutions combining performance, predictable pricing, and complete data sovereignty to support their unfettered growth.
