OVHcloud unveils Public VCF as-a-Service, an innovative managed VMware solution, tailored for SME

Roubaix – September 8th 2025 – [OVHcloud](#), a global cloud player and the European Cloud leader, today announces Public VCF as-a-Service, a game-changing managed VMware solution designed to help small and medium-sized businesses (SMBs) and managed service providers (MSPs) modernize their VMware deployments while keeping control of their costs.

A fully managed VMware solution built on VMware Cloud Director

In a context of change and uncertainties, OVHcloud Public VCF as-a-Service addresses the needs of VMware users globally, through a solution leveraging shared hardware to offer VMware functionality with the best performance/price ratio. With licensing and cloud spending being a major concern for every IT decision maker, OVHcloud Public VCF as-a-Service pricing starts as low as 299 euros/month (excl. VAT). It is built on VMware Cloud Director (VCD) and offers unmatched performance and security for a fully managed VMware solution, while remaining scalable.

Designed with SMEs, SMBs and MSPs in mind, the Public VCF as-a-Service solution offers a hassle-free modernization of existing VMware workloads, ensuring small businesses can continue to leverage their long-standing VMware investments. Organizations can quickly deploy their cloud in a scalable VMware environment or seamlessly migrate their existing VMware workloads (SDDC/VCD) in a trusted cloud infrastructure providing continuity, performance and simplicity.

To meet the evolving needs of businesses, Public VCF as-a-Service offers a streamlined approach, allowing users to access only the necessary components, without the complexity of the full VMware suite while remaining easily manageable. A number of essential tools are provided to complement Public VCF as-a-service such as a library of pre-configured images to make deployments a breeze and a managed backup solution powered by Veeam. New features will be rolled-out throughout the months to support Public VCF as-a-Service, ensuring it remains a cutting-edge solution.

OVHcloud, a Broadcom Pinnacle certified partner, offers with Public VCF as-a-Service a no compromise solution when it comes to security, resilience and ease of use. With a 99.95% SLA and resilient architecture, customers can trust that their VMware deployments are always available and secure.

“We’re proud to introduce a next-generation, fully managed VMware solution designed to protect the investments of our long-standing VMware customers, while providing new customers with a powerful platform to build, scale, and modernize their workloads. With enterprise-grade class features, unmatched performance and security, this offering redefines value in the market” said Yaniv Fdida, Chief Product and Technology Officer.

Adjustable resource allocation and unmetered guaranteed bandwidth

OVHcloud Public VCF as-a-Service starts with a pack of 16vCPU and 64 GB of RAM. Users can dynamically allocate these resources between VMs, and scale the capacity as needed through additional packs, ensuring greater cost efficiency based on their current needs.

OVHcloud Public VCF as-a-Service benefits from up to 5 Gbps guaranteed and unmetered public bandwidth and up to 5 Gbps of unmetered private bandwidth, further participating in guaranteeing predictable pricing.

Data protection and sustainability

OVHcloud Public VCF as-a-Service benefits from OVHcloud’s well-known expertise in infrastructure, offering a trusted Cloud in environmentally friendly datacenters. With the highest security and data protection standards in the form of ISO 27001 certification, customers benefit from a trusted cloud. OVHcloud datacenters take advantage of the Group unique industrial model with a watercooling system that contributes in best-in-class PUE/WUE indexes (see more data [here](#)).

Pricing & Availability

OVHcloud Public VCF as-a-Service starts at 299 EUR monthly (excl. VAT) with 16 vCPU, 64 GB of RAM and 1 TB of storage. It is available now in Europe, Canada and the United States of America.
