Changes within ENGIE Executive Committee

ENGIE is announcing the following changes and nominations within its Group Executive Committee.

- **Paulo Almirante**, Senior Executive Vice President in charge of the Renewable & Flex Power GBU will become Senior Advisor, as of July 15th, 2026, and will continue reporting to Catherine MacGregor.
- **Pedro Vasconcelos** will join ENGIE as Executive Vice President on June 1st, 2026. He will succeed to Paulo Almirante as Executive Vice President in charge of Renewable & Flex Power GBU as of July 15th and will report to Catherine MacGregor.
- **Rosaline Corinthien** is appointed Executive Vice President in charge of Power Networks. She will report to Cécile Prévieu, Executive Vice President in charge of the Networks GBU, and will join the Group Executive Committee on May 1st.

Paulo Almirante will continue to support ENGIE as a Senior Advisor, bringing his deep industry expertise and strategic perspective to several entities, notably through the board roles at EBE (Engie Brasil Energia), TABREED, Ocean Winds and UK Power Networks, once the transaction is completed. With more than 35 years of experience in the energy industry, including 15 years with ENGIE and 10 years as a member of the Group Executive Committee, he has been a key contributor to ENGIE's transformation and growth. In this advisory role, he will provide continuity and insight as the Group pursues its development ambitions and further strengthens its leadership in the energy transition.

Pedro Vasconcelos is a highly experienced energy executive with close to two decades of international experience spanning renewables, energy markets, regulation and strategic transformation at EDP. He has held senior leadership positions combining strategy, development and operational responsibilities, and has played a key role in building and scaling renewable platforms across Europe and Asia-Pacific. Throughout his career, Pedro has contributed to major growth initiatives, capital market operations and international expansion projects, while leading large, diverse teams in complex and fast-changing environments.

Rosaline Corinthien will oversee ENGIE's power networks activities, a core pillar of the Group's strategy to accelerate electrification and support the energy transition. Rosaline brings extensive experience in managing large-scale, regulated infrastructure assets and leading international teams across the development, operation and performance of power transmission and distribution networks. She also plays an active role in ENGIE's strategic roadmap, contributing to the long-term vision for power networks, security of supply and system resilience.

Catherine MacGregor, ENGIE CEO declared: *"I would like to express my deep gratitude to Paulo, whose outstanding drive and long-standing contribution to the Group have been instrumental across our activities. Most recently, at the helm of the Renewable & Flex Power GBU, he has played a critical role in shaping our renewables portfolio, combining development ambition with disciplined execution and helping establish ENGIE as one of the leaders in the energy transition. I am extremely grateful for his willingness to continue supporting the Group. I am confident that Pedro's wealth of experience and international perspective are very well suited to continue delivering on the ambitious roadmap of Renewable & Flex Power GBU. I would also like to warmly welcome Rosaline to ENGIE Executive Committee following the acquisition of UK Power Networks. I wish them every success as they take on their new responsibilities."*

Pedro Vasconcelos

Pedro Vasconcelos is a senior energy executive with close to two decades of international experience across the energy transition, including renewables, energy markets, regulation, and large-scale business transformation. He brings a strong track record in M&A and corporate development, having executed large transactions and led equity capital markets operations, alongside building and scaling platforms, leading complex organizations, and delivering strategic growth across multiple geographies.

Until recently, he was a Member of the Executive Board at EDP and part of the EDP Renewables Management Team, with responsibility for Iberia and Asia-Pacific, as well as the Global Energy Management platform and the Regulation. He also served as CEO of EDP Spain and Board Member at Ocean Winds.

Throughout his career, Pedro held several senior leadership roles, including CEO of the APAC region, Global Head of M&A and Corporate Development, and Head of EDPR Solar Strategy. He also held executive positions across EDP Innovation and EDP Internacional.

Pedro holds an MBA from INSEAD and a Master's degree in Aerospace Engineering from Instituto Superior Técnico in Lisbon.

Rosaline Corinthien

Rosaline Corinthien brings more than 25 years of experience across the entire energy value chain, from regulation and large-scale gas and power infrastructure to renewables, strategy, and complex international operations.

She began her career in the industrial energy sector before joining the French Energy Regulation Commission (CRE), where she shaped access rules for LNG terminals. She then moved into power generation, leading major projects such as the construction of a combined-cycle gas plant in France.

Rosaline joined ENGIE in 2012, taking on senior leadership roles across Asia, Europe, and Latin America. Her track record includes serving as Managing Director of Storengy China, leading ENGIE's gas business in China, holding Group-wide responsibilities in Global Energy

Management, and acting as Deputy Group HR Director, overseeing executives, talent development, and HR innovation.

She later became CEO of ENGIE France Renewables, then Managing Director Thermal South America and Country Manager Chile. She now leads ENGIE's global Power Networks activities, accelerating the development and operation of transmission and distribution infrastructure worldwide.

Rosaline holds a Master of Science from IFP School and a degree in Thermodynamics from INSA.

About ENGIE

ENGIE is a major player in the energy transition, whose purpose is to accelerate the transition towards a carbon-neutral economy. With more than 90,000 employees in 30 countries, the Group covers the entire energy value chain, from production to infrastructures and sales. ENGIE combines complementary activities: renewable electricity and green gas production, flexibility assets (notably batteries), gas and electricity transmission and distribution networks, local energy infrastructures (heating and cooling networks) and the supply of energy to individuals, local authorities and businesses. Every year, ENGIE invests on average €12 billion per year to drive forward the energy transition and achieve its net-zero carbon goal by 2045.

Turnover in 2025: €71.9 billion. The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main financial indices (CAC 40, Euronext 100, FTSE Euro 100, MSCI Europe) and non-financial indices (DJSI World, Euronext Vigeo Eiris - Europe 120 / France 20, MSCI EMU ESG screened, MSCI EUROPE ESG Universal Select, Stoxx Europe 600 ESG-X).
