

SAINT-GOBAIN ACCELERATES ITS GROWTH IN EGYPT WITH THE OPENING OF TWO NEW PRODUCTION CAPACITIES

Saint-Gobain announces two new production capacities in Egypt to further accelerate its profitable growth in the country:

- The inauguration of a **second float glass production line** in Ain Sokhna, operated through a joint venture between Saint-Gobain and Şişecam, doubling the site's capacity.
- The launch of a **new plasterboard manufacturing facility** in Sadat City in November, strategically located within Egypt's key urban development corridor. The facility is integrated with the Group's existing plaster line to create a comprehensive gypsum solutions hub, enhancing service to customers.

Saint-Gobain has been present in Egypt since 2006, operates 4 major manufacturing hubs, employs 900 people and generates annual **revenues of around €150 million, which have tripled over the past 8 years**. With these investments, the Group, a key partner in local construction ecosystems – particularly among architects and contractors – broadens its presence in the country into plasterboard, to expand beyond its leading positions in glass, plaster and construction chemicals.

The Egyptian construction market benefits from **supportive megatrends**, including strong demographic growth and urbanization needs, with the country planning to build 37 smart cities by 2050 to meet the 30% increase in its 120 million population expected over the period.

With these investments, Saint-Gobain is further strengthening its position as the **leader in light and sustainable construction in Egypt, a high-growth country**.

These investments are fully aligned with Saint-Gobain's "**Lead & Grow**" strategic plan, which aims to accelerate profitable growth.

About Saint-Gobain
