

Press release

Largest contract ever awarded to the Group: € 73m

Strasbourg (France), March 16, 2021 - 2CRSi (ISIN: FR0013341781), designer and manufacturer of high-performance, energy-efficient computer servers, announces it has been awarded a landmark contract. This multi-year contract is the largest ever won by the Group to date.

A European team from Boston has been awarded a contract worth up to €73 million by a new customer for the provision of high-performance computing (HPC) solutions. The details of this contract are "restricted" information.

The contract has an initial duration of 5 years and can be extended for an additional 4 years. The contribution of this new customer to the Group's financials will only be effective from the second half of the fiscal year 2022/23.

"In our industry, it is good to know that a European group can still win a major European contract. This success is a great recognition of our expertise in providing high-performance computing solutions. It also confirms the synergies that have been created by the Boston Limited group's merger with 2CRSi", says Alain Wilmouth, co-founder of 2CRSi.
