

Press release

2CRSi chosen by a major European defence firm for its new HPC cluster

Strasbourg (France), 19 October 2022 - 2CRSi (EPA: 2CRSI, ISIN: FR0013341781), a designer and manufacturer of high-performance energy-efficient IT solutions, announces a new HPC contract to supply hardware and software to a major European defence firm.

Similar to the record contract announced at the start of the year, this new order is for the supply of a new high-performance computing (HPC) cluster. The client - a global expert in industrial project management, design and integration of combat systems - chose 2CRSi to design, manufacture and deploy its HPC solution.

Based on ongoing contracts, the defence sector has become the most important sector for the 2CRSi Group, with expected revenue of €80m over the next 52 months.

The new agreement, which was won against traditional sector players, confirms the added value and excellence of 2CRSi's solution and affirms the sovereignty of European governments and defence firms in their choice of technology providers.

The order will be delivered in full over the fiscal year ending in February 2023. It marks an auspicious start to closer cooperation between the two groups.

"With factories, teams and subsidiaries in six European countries (France, Germany, United Kingdom, Switzerland, Belgium and the Netherlands), 2CRSi Group defends government sovereignty with its "Think global, Act local" business model. As well as being a major source of revenue, our sales and technical success in the defence industry reflects our commitment to maintaining technological skills within 2CRSi," said Alain Wilmouth, Chairman and Chief Executive Officer of 2CRSi.
