

2CRSi wins another significant contract in immersion for European security

Strasbourg, September 9, 2024 - 2CRSi proudly announces that it has once again been selected by AIRBUS PROTECT to supply a significant number of high-performance OCtoPus 1.6SR-ORV3 computing servers. These servers will be used in immersion by the European Commission and a European crime-fighting agency. The contract stipulates the delivery of these servers starting this fall.

Following the announcement of an initial collaboration between 2CRSi and these entities in September 2019, the sales and R&D teams are proud to learn that they have once again been selected by **AIRBUS PROTECT** to supply a significant number of high-performance OCtoPus 1.6SR-ORV3 servers. These servers will be immersion-cooled and used for critical crime-fighting efforts. The contract, of significant value, provides for the delivery of these servers starting this fall.

2CRSi's OCtoPus 1.6SR-ORV3 servers will play a crucial role in cybersecurity missions, European security, and the detection and fight against illegal trafficking. This project, which fully engaged the R&D teams to renew and innovate within this server range, confirms **AIRBUS PROTECT**'s renewed confidence in the cutting-edge technological solutions developed by 2CRSi.

This contract also positions 2CRSi in a long-term dynamic of providing advanced technological solutions to European institutions. It further confirms, once again, that the technological choice of immersion cooling, mastered by 2CRSi for many years, fully delivers on its promises of performance and energy consumption reduction.

Pride and Innovation

"We are very proud to have won this new tender with AIRBUS PROTECT. This success is the result of the commitment and quality of work from our R&D department. Once again, our teams have demonstrated innovation and met the expectations of our most demanding clients," said Alain Wilmouth, Co-Founder, President, and CEO of 2CRSi.

High performance servers

About 2CRSi

Founded in Strasbourg, the 2CRSi Group designs and manufactures eco-efficient high-performance servers, particularly dedicated to Artificial Intelligence. In the 2023-2024 fiscal year, the Group achieved a revenue of €220 million. The Group now markets its innovative solutions (computing, storage, and networking) in over 50 countries. 2CRSi has been listed on the regulated Euronext market in Paris since June 2018 (ISIN Code: FR0013341781), and its shares were transferred to Euronext Growth in November 2022.
