3. NOTIFICATION AND AUTHORISATION

The *Commission de Surveillance du Secteur Financier (CSSF)*, Luxembourg, has provided the *Autorité des marchés financiers (AMF)* with a certificate of approval attesting that the Debt Issuance Programme Prospectus has been drawn up in accordance with the Prospectus Directive.

The Issuer and the Guarantor have authorised the use of these Final Terms and the Debt Issuance Programme Prospectus dated 2 May 2008 by the Dealer/Managers and the entities in charge of the distribution of the Notes (the **Distributors** and, together with the Dealer/Managers, the **Financial Intermediaries**) in connection with offers of the Notes to the public in France for the period set out in paragraph 12 below, being specified that the address of the Distributor is available upon request to the Dealer (specified above in the item 40 of the Part A).

4. INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE ISSUE

Save for any fees payable to the Dealer, and except as mentioned below, so far as the Issuer is aware, no person involved in the issue of the Notes has an interest material to the offer.

The Issuer and Société Générale expect to enter into hedging transactions in order to hedge the Issuer's obligations under the Notes. Should any conflicts of interest arise between (i) the responsibilities of Société Générale as Calculation Agent for the Notes and (ii) the responsibilities of Société Générale as counterparty to the above mentioned hedging transactions, the Issuer and Société Générale hereby represent that such conflicts of interest will be resolved in a manner which respects the interests of the Noteholders.

8. PERFORMANCE OF INDEX/FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT AND ASSOCIATED RISKS AND OTHER INFORMATION CONCERNING THE UNDERLYING (Index Linked Notes only)

Under these Notes, the Noteholders will not receive any coupons during the term of the Notes. At maturity, the Noteholders are entitled to receive at least the Specified Denomination. The actual redemption date of these Notes is directly related to the Valuation-of-one-Note on each Annual Valuation Date: the better the Valuation-of-one-Note, the sooner the redemption date and conversely, the worse the Valuation-of-one-Note and the later the redemption date. The return under these Notes is totally linked to the performance of the Underlying(s): the higher the performance, the higher the return. The return depends upon the fact that the performance of the Underlying(s) reaches or does not reach a pre-determined threshold. Accordingly, a small downward or upward movement of the Underlying(s) close to the threshold may result in a significantly larger increase or decrease of the return of the Notes. The return of these Notes is linked to the performances of the Underlying(s) as calculated on pre-determined Valuation Dates, and regardless of the level of such Underlying(s) between these dates. As a result, the Closing Price of the Underlying(s) on these dates will affect the value of the Notes more than any other single factor.

9. PERFORMANCE OF RATE[S] OF EXCHANGE AND EXPLANATION OF EFFECT ON VALUE OF INVESTMENT (Dual Currency Notes only)

Not Applicable

10. OPERATIONAL INFORMATION

$$99,24\% \times \left(1 + 5,10\% \times \frac{Nb(t)}{360} \right)$$

Where :

“Nb(t)” means, the number of calendar days between the Issue Date and such date “t” on which the Market Value of the Note will be calculated (both dates included).

DIRI(j)
(j being any calendar day)

The following Index as defined below:

A) Definition of the Index

A.1 Harmonised Index of Consumer Prices excluding tobacco

“HICP” means the “Non-revised Index of Consumer Prices excluding Tobacco”, measuring the rate of inflation in the European Monetary Union excluding tobacco, expressed as an index and published by Eurostat (the “Index Sponsor”). The first publication or announcement of a level of such index, excluding a provisional value of such index, but including but not limited to an estimated value of such index, for a given month shall be final and conclusive and later revisions to the level for such month will not be used in any calculations.

A.2 Calculation of the Daily Inflation Reference Index

DIRI(j) means Daily Inflation Reference Index for any calendar day (j)

Daily Inflation Reference Index appears on the Reuters page “OATEI01”. If the value of such Index cannot be or ceases to be determined, then the Calculation Agent shall select another Reuters page or determine in good faith the value of such Index by reference to such sources as it may select in its absolute discretion.

For information purposes, DIRI(j) in relation to a calendar day (j) of a given month (M) (other than the first calendar day of that given month (M)), the linear interpolation of the HICP pertaining respectively to the third month preceding such month (M-3) and the second month preceding such month (M-2) calculated in accordance with the following formula:

$$\text{DIRI}(j) = \text{HICP}(M-3) + [\text{HICP}(M-2) - \text{HICP}(M-3)] \times [\text{act}(j,M) / \text{days}(M)]$$

with:

$\text{act}(j,M)$ = number of calendar days between the first calendar day of month (M) (excluded) and calendar day (j) of month (M) (included)

$\text{days}(M)$ = number of calendar days in the month (M)

DIRI(j) in relation to a calendar day (j) of a given month (M) which is the first calendar day of that given month (M) is equal to HICP(M-3).

A.3 Roundness rules

The Daily Inflation Reference Index will be rounded off to the fifth decimal place.

A.4 Rebasing of the Index

If HICP is rebased at any time (the “Rebased HICP”), the Rebased HICP will be used for purposes of determining HICP for this Transaction; provided, however, that the Calculation Agent shall make adjustments to the current fixings of the Rebased HICP so that the Rebased HICP reflects the same rate of inflation as HICP before it was rebased.

B) Events affecting HICP

B.1 Substitute Index:

If the HICP for a given month is not published or is published as being a provisional HICP, by the end of the next month, a substitute HICP (the "Substitute HICP") shall be determined by the Calculation Agent in accordance with the following provisions:

1. If a provisional HICP has already been published and no other value of the HICP for that given month has been afterwards published, such provisional HICP shall automatically be used as the Substitute HICP for the calculation of Daily Inflation Reference Index requiring the value of the HICP for that month.

2. If a provisional HICP has already been published and another value of the HICP for that given month has also been afterwards published, this another value will automatically apply for the calculation of Daily Inflation Reference Index in respect of any calendar days from and excluding the calendar day of that public release.

3. As long as no provisional HICP is available, the Substitute HICP shall be calculated on the basis of the most recently published figure adjusted as set out in the following formula:

$$\text{Substitute HICP (M)} = \text{HICP(M-1)} \times \left[\frac{\text{HICP(M-1)}}{\text{HICP(M-13)}} \right]^{\frac{1}{12}}$$

where :

"HICP(M-1)" means the latest HICP (whether definitive or provisional) published by Eurostat in respect of the month prior to the month in respect of which the Substitute HICP is being calculated.

"HICP(M-13)" means the HICP (whether definitive or provisional) published by Eurostat in respect of the month which is twelve (12) calendar months prior to the month of HICP(M-1).

B.2 Third Party calculates or publishes the Index:

If HICP is no longer calculated by Eurostat but is calculated by a successor entity without any modification of the calculation formula, HICP used shall be the HICP calculated by such successor.

If HICP is no longer published by Reuters on the page "OATEI01" but is published by a successor entity without any modification of the calculation formula, HICP used shall be the HICP published by such successor.

B.3 Changes in the Index calculation formula:

In case of modification of the calculation formula by Eurostat or a successor entity, the Calculation Agent will determine the adjustment levels in its sole and absolute discretion.

RQI_i
(i from 0 to 1) RQI_i being the Daily Inflation Reference Index in respect of Valuation Date(i)

PerfInflation(1) (RQI₁/RQI₀)-1

Knock-in-Premium(n);
(n from 1 to 5) Knock In Premium(1) = Specified Denomination x 108%
