Under these Notes, the Noteholders are entitled to receive indexed coupons totally linked to the performance of the Underlying calculated on pre-determined Valuation Dates, on the basis of its initial level.

At maturity, the Noteholders are not entitled to receive the amount initially invested directly related to the performance of the Underlying: the better the performance, the sooner the redemption date and conversely, the worse the performance and the later the redemption date.

The return under these Notes is totally linked to the performance the Underlying(s): the higher the performance, the higher the return. The return of these Notes is linked to the performances of the Underlying as calculated on pre-determined Valuation Dates and regardless of the level such Underlying between these dates. As a result, the Closing Level of the Underlying on these dates will affect the value of the Notes more than any other single factor.

The Notes are not capital guaranteed. In a worse case scenario, investors could sustain an entire loss of their investment and should therefore reach an investment decision on this product only after careful consideration with their own advisers as to the suitability of this product in light of their particular financial circumstances.
