Description of the S&P GSCI® Aluminum Total Return Index Linked Certificates due 2059

The section on "Description of Commodity Indices – Single commodity indices" on page 119 of the Base Prospectus shall be supplemented for the purpose of the Certificates by the addition of the additional single index disclosure as set out below:

The S&P GSCI® Aluminum Total Return Index

The S&P GSCI® Aluminum Total Return Index is a sub-index of the S&P GSCI® and is calculated in the same manner as the S&P GSCI® (as more fully described above under the heading "The S&P GSCI") with one significant exception: the S&P GSCI® Aluminum Total Return Index consists only of one industrial metals-related commodity contract included in the S&P GSCI®, at present, the Aluminum contract, such that the weight of such commodity contract in the S&P GSCI® Aluminum Total Return Index is equal to 100 per cent. The S&P GSCI® Aluminum Total Return Index is a total and not an excess, return index and therefore includes the Treasury Bill return on the hypothetical investment in the contract included therein.
