

PRESS RELEASE

SES WORLD SKIES COOPERATES WITH ANDEAN COMMUNITY TO DEVELOP ORBITAL SLOT AT 67 DEGREES WEST

The Hague, NL, February 8, 2010 - SES WORLD SKIES, an operating unit of SES S.A. (Euronext Paris and Luxembourg Stock Exchange: SESG), announces that it has reached an agreement with the Andean Community of Nations (CAN) regarding the long-term use of the 67 degrees West orbital position. The 67 degrees West orbital position offers an extensive Ku-band satellite frequency range and excellent viewing angles for coverage of the Americas and the Caribbean.

The Andean Community consists of Bolivia, Colombia, Ecuador and Peru. The organisation was established in 1997 to foster the political, economic and social integration of its member countries. One of its long-standing objectives has been the development of the 67 degrees West geostationary orbital position with the International Telecommunications Union (ITU) for the benefit of the Andean people.

Freddy Ehlers, Secretary General of the Andean Community, said: "We are very pleased with this agreement with SES WORLD SKIES for the development of the Andean orbital rights at 67 degrees West. Through this agreement, the Andean Community will deepen and strengthen the economic integration and socio-cultural cohesion of its Member Countries, as well as expand communications throughout the region."

Rob Bednarek, President and CEO of SES WORLD SKIES, said: "This agreement allows us to assist the Andean Community in developing this orbital slot, and offers an additional opportunity to SES WORLD SKIES to efficiently serve Latin America and the Caribbean with state-of-the-art satellite solutions for television distribution, broadband connectivity and government services. We look forward to a mutually beneficial relationship with the Andean Community and to developing 67 degrees West into a prime orbital neighborhood for the region."

About SES WORLD SKIES

SES WORLD SKIES is the new global division of SES, created through the combination of the former SES NEW SKIES and SES AMERICOM. The company operates a fleet of 25 satellites - part of the 41 spacecraft of the SES group - delivering services as diverse as television distribution and broadcast, internet access, data transmission and business and government communications to customers worldwide. SES WORLD SKIES currently has five additional satellites under construction. The company's unique customer-focused approach allows it to offer the best satellite solutions for a host of business and government requirements, with a view toward helping customers meet their short-term challenges and realize their longer-term goals. SES WORLD SKIES comprises a world-class team of customer care and technical professionals located in Princeton (NJ), The Hague, Washington D.C., Singapore, Beijing, London, Sao Paulo, Mexico City, Sydney, Accra and Johannesburg. Visit www.ses.com for more information.

About SES

SES (Euronext Paris and Luxembourg Stock Exchange: SESG) wholly owns the market-leading satellite operators SES ASTRA and SES WORLD SKIES, 90% of SES SIRIUS in Europe, and participations in Ciel in Canada and QuetzSat in Mexico. SES provides outstanding satellite communications solutions via a global fleet of 41 satellites in 26 orbital locations. For further information: www.ses.com
