RISK FACTORS

Prospective purchasers of the TURBO Warrants are advised to read the complete Base Prospectus including the chapter on "Risk Factors" and to seek their own advice (including tax consultants and accountholding bank) before reaching an investment decision.

Potential investors intending to purchase the TURBO Warrants should only purchase the TURBO Warrants if they are able to evaluate the merits and risks of such a purchase and if they are able to sustain the loss of the purchase price and of the transaction costs in connection with the purchase of the TURBO Warrants.

RISKS ASSOCIATED WITH THE UNLIMITED TURBO WARRANTS

- **General**

Unlimited TURBO Warrants on indices (the "**TURBO Warrants**") grant to the holder (the "**Warrantholder**") the right (the "**Option Right**") to receive an amount in cash expressed in or converted into Euro, as the case may be, and multiplied with the Ratio by which the reference price of the underlying asset (the index) (the "**Underlying**") exceeds the Strike Price as determined in the Terms and Conditions of the TURBO Warrants on the Valuation Date (in the case of TURBO BULL Warrants) or is exceeded by the Strike Price (in the case of TURBO BEAR Warrants) (the "**Cash Settlement Amount**"). The Underlying Assets will not be delivered.

The Option Right will expire upon the occurrence of a Knock-out Event (see below "Knock-out Event").

The TURBO Warrants do not entitle the Warrantholders to receive a coupon payment or dividend yield and therefore do not constitute a regular source of income. Possible losses in connection with an investment in the TURBO Warrants can therefore not be compensated by other income from the TURBO Warrants.

- **Loss Risks / Knock-out Event**

As soon as, at any time on or following the Issue Date of the TURBO Warrants, a price of the Underlying reaches or falls below (in the case of TURBO BULL Warrants) or reaches or exceeds (in the case of TURBO BEAR Warrants) the Knock-out Level stipulated in the Terms and Conditions (each, a "**Knock-out Event**"), the TURBO Warrants will expire without requiring any further action of the Warrantholder.

In that case, the Knock-out Amount shall be determined by the Issuer in its reasonable discretion (§ 315 BGB) and may be zero. **In that case, the Warrantholder will incur a loss that almost corresponds to the full purchase price paid for the TURBO Warrant**

The Knock-out Level shall be determined by the Issuer for each Adjustment Period by taking into account the relevant prevailing market conditions in its reasonable discretion (§ 315 BGB). As the Strike Price increases (in the case of TURBO BULL Warrants) or decreases (in the case of TURBO BEAR Warrants) on each calendar day during an Adjustment Period, while the Knock-out Level remains unchanged during an Adjustment Period, the difference between the Knock-out Level and the Strike Price will continue to decrease during an Adjustment Period. (For the relevant details, please refer to the Terms and Conditions set out below.)

- **Continuous Changes in the Strike Price**

With regard to the Cash Settlement Amount due to the investor, solely the difference between the Reference Price of the Underlying and the Strike Price as applicable on the Valuation Date shall be authoritative. It must be taken into account in this context that the Strike Price of the TURBO Warrants will fluctuate daily, and that, in the case of TURBO BULL Warrants, it will mostly increase and, in the case of TURBO BEAR Warrants, it will mostly decrease. If the price of the Underlying

does not equally increase or decrease by a corresponding amount, the value of the TURBO Warrants will decrease on each day of the maturity period.

On each calendar day, the Underlying shall change by an Adjustment Amount, which is calculated on the basis of the Reference Interest Rate applicable with regard to the relevant Adjustment Period, plus an Interest Rate Adjustment Factor to be determined by the Issuer (with regard to the definitions of "**Adjustment Amount**", "**Adjustment Period**", "**Reference Interest Rate**" and "**Interest Rate Adjustment Factor**", please refer to § 2 of the Terms and Conditions).

- **Adjustments and Extraordinary Termination**

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the TURBO Warrants.

If an Adjustment Event (as defined in § 5 of the Terms and Conditions) (e.g. the substitution of the Index by a successor index, the implementation of a capital increase or a similar measure and/or a regular dividend distribution regarding one of the shares contained in the Index) has a significant effect on the level of the Index, the Ratio, the applicable Strike Price and the applicable Knock-out Level shall be adjusted by the Issuer in its reasonable discretion (§ 315 BGB). Such an adjustment shall take effect on the day on which the relevant Adjustment Event has an effect on the level of the index.

Holders of TURBO BEAR Warrant should take into account that the adjustment of the Strike Price and the Knock-out Level may trigger a Knock-out Event regarding the relevant TURBO BEAR Warrant.

This will, for instance, be the case if the price of the share contained in the index as quoted on the stock exchanges or within the trading systems whose prices are used for Index calculation purposes does not, or does not fully, reflect the markdown caused by the relevant capital measure or dividend distribution.

The Issuer may be entitled to give notice of extraordinary termination regarding the TURBO Warrants in accordance with the Terms and Conditions. In that case, the TURBO Warrants shall expire prematurely. The extraordinary termination amount per TURBO Warrant payable to the Warranholders shall be determined by the Issuer in its reasonable discretion (§ 315 BGB).

- **"Unlimited" TURBO Warrants; Necessity of Exercise; Sale of the TURBO Warrants**

The essential characteristic of the TURBO Warrants is that the TURBO Warrants are not automatically exercised during their life. It is a prerequisite for the payment of the Cash Settlement Amount that the Warranholder has exercised its TURBO Warrants or that the Issuer has terminated the TURBO Warrants. Without such exercise or termination of the TURBO Warrants there is no guarantee that the Warranholder will receive the Cash Settlement Amount. As it cannot be expected that the Issuer will terminate the TURBO Warrants the Warranholder is compelled to exercise its TURBO Warrants in accordance with the Terms and Conditions of the TURBO Warrants in order to receive the Cash Settlement Amount.

Warranholders should be aware that an exercise of the TURBO Warrants is only possible with respect to the Exercise Dates detailed in the Final Terms. During the period between two Exercise Dates a realisation of the economic value of the TURBO Warrants (or part of it) is only possible by selling the Warrants.

A sale of the TURBO Warrants, however, requires that there are market participants willing to purchase the TURBO Warrants at the respective price. If there are no market participants willing to do so the value of the Warrants may possibly not be realised. The Issuer has no obligation to provide for a trading in the TURBO Warrants or to repurchase the TURBO Warrants itself.

- **Risk of Loss due to Changes in the Volatility of the Underlying**

Changes in the frequency and intensity of fluctuations in the price of the Underlying anticipated by the market participants (implied volatility) may reduce the value of the TURBO Warrants even if the price of the Underlying does not change. A generally positive development in the price of the Underlying

does not necessarily result in an increase in the price of the TURBO Warrants. The price of the TURBO Warrants may even fall if the performance of the Underlying is overcompensated by a decreasing volatility with a negative effect on the value of the TURBO Warrants.

- **Risk of Loss due to a Decrease in the Time Value**

Depending on the expectations of the market participants with respect to the future performance of the Underlying, they are prepared to pay a price for a TURBO Warrant which differs to a greater or lesser extent from the intrinsic value of the TURBO Warrant (the intrinsic value means the amount by which the market price of the Underlying exceeds the Strike Price (in the case of a TURBO BULL Warrant) or is exceeded by the Strike Price (in the case of a TURBO BEAR Warrant)).

- **Risk associated with Leverage**

A typical feature of TURBO Warrants is their leverage effect on the earnings prospects of the invested capital: The price of TURBO Warrants always reacts over-proportionately to changes in the price of the Underlying and thus, offers chances of higher profit during their lifetime - but bear at the same time high risks of incurring a loss. This is because the leverage has an effect in both directions - i.e. not only upwards in favourable periods, but also downwards in unfavourable periods. The greater the leverage, the riskier is the purchase of TURBO Warrants.

- **Time Lag after Exercise – Market Disruption Event**

In the case of any exercise of the TURBO Warrants, there will be a time lag between the time a Warrantholder gives instructions to exercise and the time the applicable Cash Settlement Amount relating to such exercise is determined. Any such delay between the time of exercise and the determination of the Cash Settlement Amount will be specified in the applicable Final Terms. However, such delay could be significantly longer, particularly in the case of the occurrence of a market disruption event (if applicable) or following the imposition of any exchange controls. The applicable price of the Underlying may change significantly during any such period, and such movement or movements could decrease the Cash Settlement Amount of the TURBO Warrants being exercised and may result in such Cash Settlement Amount being zero.

- **TURBO Warrants are Unsecured Obligations**

The TURBO Warrants are unsecured and unsubordinated obligations of the Issuer and will rank *pari passu* with all present and future unsecured and unsubordinated obligations of the Issuer, without any preference among themselves and without any preference one above the other by reason of priority of date of issue, currency or any payment or otherwise, except for obligations given priority by law. Any person who purchases any of the TURBO Warrants is relying upon the creditworthiness of the Issuer and has no rights under the TURBO Warrants against any other person. Together with the general investment risk an investment in the TURBO Warrants is also concerned with possible default risk of the Issuer. The Issuer may issue several issues of warrants relating to various reference underlying assets which may be specified in the applicable Final Terms. However, no assurance can be given that the Issuer will issue any warrants other than the warrants to which a particular set of Final Terms relates. At any given time, the number of warrants outstanding may be substantial. TURBO Warrants provide opportunities for investment and pose risks to investors as a result of fluctuations in the value of the underlying asset. In general, certain risks associated with the TURBO Warrants are similar to those generally applicable to other options or warrants of private corporate issuers.

- **Issuer Risk**

In addition to the risk connected with the investment in the Underlying of a TURBO Warrant, the investor bears the risk that the financial situation of the Issuer of the TURBO Warrant declines – or that insolvency or bankruptcy proceedings are instituted against the Issuer – and that as a result the Issuer cannot fulfil its payment obligations under the TURBO Warrants.

- **Possible Illiquidity of the Turbo Warrants in the Secondary Market**

It is not possible to predict the price at which TURBO Warrants will trade in the secondary market or whether such market will be liquid or illiquid. The Issuer may, but is not obliged to, list TURBO Warrants on a stock exchange.

The Issuer may, but is not obliged to, at any time purchase TURBO Warrants at any price in the open market or by tender or private treaty. Any TURBO Warrants so purchased may be held or resold or surrendered for cancellation. The Issuer may, but is not obliged to, be a market-maker for an issue of TURBO Warrants. Even if the Issuer is a market-maker for an issue of TURBO Warrants, the secondary market for such TURBO Warrants may be limited. To the extent that an issue of TURBO Warrants becomes illiquid, an investor may have to exercise such TURBO Warrants to realise value.

Important factors in determining the price of TURBO Warrants are in particular:

- the actual price of the relevant Underlying and the expectations of market participants regarding its price, and
- the anticipated frequency and intensity of fluctuations in the price of the relevant Underlying (volatility).

- **Potential Conflicts of Interest**

The Issuer and its affiliates may also engage in trading activities (including hedging activities) related to the Underlying of the TURBO Warrants and other instruments or derivative products based on or related to the Underlying for their proprietary accounts or for other accounts under their management. The Issuer and its affiliates may also issue other derivative instruments in respect of the Underlying. Such activities could present certain conflicts of interest, could influence the prices of the Underlying or other securities and could adversely affect the value of such TURBO Warrants.

- **Risks in connection with Borrowing**

If the investor obtains a loan in connection with financing the purchase of the TURBO Warrants the investor does not only bear the risk of sustaining the loss in connection with the TURBO Warrants if the price of the Underlying develops unfavourably, but also has to pay back the loan and pay the interest connected with it. This means a substantial increase in risk. An investor can never rely on being able to pay back the loan and the interest connected with it through gains derived from the purchase of the TURBO Warrants. Prospective purchasers of TURBO Warrants should therefore carefully consider their particular financial circumstances and whether they will be able to pay back the loan and pay the interest connected with it even if the investor has to sustain losses instead of the expected gains.

- **Risks associated with Currency**

If the Underlying Asset of the TURBO Warrants is quoted in another currency than the TURBO Warrant any risk in connection with an investment in the TURBO Warrants does not only depend on the development of the price of the Underlying Asset but also on the development of the respective currencies. Unfavourable developments in these markets can increase the risk and could lead to a decrease in the value of the TURBO Warrants or in the Cash Settlement Amount.

- **Transactions Excluding or Limiting Risk**

The investor cannot expect that at all times during the lifetime of the TURBO Warrants transactions can be concluded which exclude or limit the risks incurred from a purchase of TURBO Warrants; this depends on the market conditions and the specific features of such TURBO Warrants as specified in the Final Terms of such TURBO Warrants. Such transactions can under certain circumstances be concluded only at an unfavourable market price and lead to a corresponding loss.

- **Influence of ancillary Costs on Potential Profit**

Investors should consider that the return on the investment in the TURBO Warrants is reduced by the costs in connection with the purchase and sale of the TURBO Warrants.

Minimum or fixed commissions per transaction (purchase and sale) combined with a low order value (price of the TURBO Warrant times quantity) can lead to costs which, in extreme cases, may exceed the value of the TURBO Warrants purchased. Additional costs arise generally if the TURBO Warrants are exercised. Together with the costs directly linked to the purchase of the TURBO Warrants, these additional costs may be considerable compared with the total Cash Settlement Amount received by the Warrantholder exercising his TURBO Warrants.

- **The Influence of Hedging Transactions of the Issuer on the TURBO Warrants**

The Issuer and/or its affiliates may in the course of their normal business activity engage in trading in the Underlying Asset. In addition, the Issuer may conclude transactions in order to hedge itself partially or completely against the risks associated with the issue of the TURBO Warrants. These activities of the Issuer and/or its affiliates may have an influence on the market price of the TURBO Warrants. A possibly negative impact of the conclusion or dissolution of these hedging transactions on the value of the TURBO Warrants or the size of the Cash Settlement Amount to which the holder of a Warrant is entitled cannot be excluded.

- **Risk Factors relating to the underlying**

The value of the respective underlying depends on a number of interrelated factors, including economic, financial and political events beyond the Issuer's control. The historical experience of the respective underlying should not be taken as an indication of future performance of such underlying during the term of any Warrant. Additionally, there may be regulatory and other ramifications associated with the ownership by certain investors of the TURBO Warrants.

- **Special Risks of TURBO Warrants relating to Indices**

Dependency on the value of the index components

The respective value of an index is calculated on the basis of the value of its components. Changes in the composition of an index as well as factors that (may) influence the value of the components also influence the value of the relevant index and can thus influence the yield from an investment in the TURBO Warrants. Fluctuations in the value of one component of an index may be compensated or aggravated by fluctuations in the value of another component. Historical performance of the components does not represent any guarantee of future performance. An index used as an underlying may not, in certain circumstances, be maintained for the entire term of the TURBO Warrants.

An index may reflect the performance of assets of some countries or some industries only. Therefore, the value of the relevant index depends on the development of the index components of individual countries or industries. Even if more than just a few countries or industries are represented, it is still possible that the industries contained in the relevant index are weighted unevenly. This means that in case of an unfavourable development in one industry contained in the relevant index, the index may be affected disproportionately by this adverse development.

Investors should note that the selection of an index is not based on the expectations or estimates of the Issuer in respect of the future performance of the selected index. Investors should thus make their own estimates in respect of the future performance of the components of an index and the index itself on the basis of their own knowledge and sources of information.

No influence of the Issuer

As a general rule, the Issuer has no influence on the composition and performance of an underlying index or the performance of its components. A change in composition may have an adverse effect on the value of the TURBO Warrants.

No liability of the index sponsor

Where the Issuer is not the index sponsor of the relevant index, TURBO Warrants based on an index as underlying are generally not sponsored or otherwise supported by any index sponsor, and the relevant index is composed and calculated by the respective index sponsor without any account being taken of the Issuer's or the interests of the holder's of the TURBO Warrants. In such case, the index sponsors does not assume any obligation or liability in respect of the issue, sale or trading of the TURBO Warrants.

No recognised financial index, no independent third party

The TURBO Warrants may be linked to an index which is not recognised financial index but index that have been created for the issuance of the relevant TURBO Warrant. The index sponsor of such index might not be independent from the Issuer and may thus favour the interests of the Issuer over the interests of the holder of the TURBO Warrants.

Composition fees

Certain fees, costs, commissions or other charges for composition and calculation may be deducted when calculating the value of an index on the basis of the value of its individual components. As a result, the performance of the individual index components is not acknowledged in full when calculating the performance of the respective index, but is reduced by the amount of such fees, costs, commissions and other charges, and these may to some extent erode any positive performance displayed by the individual components. It should also be noted that such costs may well also be incurred if the index returns negative performance.

Publication of the index composition

Even if the composition of the relevant indices is to be published on a website or in other media specified in the Final Terms, the composition shown might not always be the current composition of the respective relevant index because the posting of the updated composition of the respective index on the website might be delayed considerably, sometimes even by several months

With regard to the first Adjustment Period, the Strike Price on the Issue Date shall be used for the aforementioned calculations.

The "**Adjustment Day**" shall be the first calendar day in each month or, if such day is not a Business Day, the next following Business Day. The first Adjustment Day shall be 01 June 2010.

The "**Adjustment Percentage**" applicable during an Adjustment Period shall be the sum of (i) the interest rate published on USD1MD= (or a successor page thereto) on the Adjustment Day falling within the relevant Adjustment Period (the "**Reference Interest Rate**") and (ii) the Interest Rate Adjustment Factor applicable during the relevant Adjustment Period, the result being divided by 365. The Reference Interest Rate for the first Adjustment Period shall be 0.44%.

The **"Interest Rate Adjustment Factor"** shall be a percentage determined by the Issuer on an Adjustment Day for the Adjustment Period beginning on such Adjustment Day in its reasonable discretion (§ 315 German Civil Code (*BGB*)), in each case taking into account the prevailing market conditions. The Interest Rate Adjustment Factor for the first Adjustment Period shall be the percentage stated in paragraph 2.

The respective Interest Rate Adjustment Factor for subsequent Adjustment Periods shall in each case be published on the Issuer's website at www.warrants.commerzbank.com.

"Market Disruption Event" means the occurrence or existence of any suspension of, or limitation imposed on, trading in the securities contained in the Index on the stock exchanges or trading systems the prices of which are the basis for the calculation of the Index, or the suspension of or limitation imposed on trading in option or futures contracts on the Index on the options or futures exchange with the highest trading volume of option or future contracts relating to the Index, provided that any such suspension or limitation is material in the reasonable discretion of the Issuer (§ 315 German Civil Code (*BGB*)). The occurrence of a Market Disruption Event shall be published in accordance with § 11

A limitation regarding the office hours or the number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the relevant exchange. A limitation on trading imposed during the course of a day by reason of movements in price exceeding permitted limits shall only be deemed to be a Market Disruption Event in the case that such limitation is still prevailing at the time of termination of the trading hours on such date.

"Payment Business Day" means a day on which the Trans-European Automated Real-Time Gross settlement Express Transfer system which utilises a single shared platform (TARGET2) is open.

"Ratio"

The Ratio is 0.0005.

"Reference Price" shall be the closing level of the Index as determined and published by the Index Sponsor on the Valuation Date.

The **"Strike Price"** shall change on each calendar day between the Issue Date and the relevant Valuation Date. The Strike Price on a calendar day ("**T**") shall correspond to the Strike Price on the preceding calendar day ("**T-1**"), plus (in the case of TURBO BULL Warrants) or less the Adjustment Amount applicable on T-1 (in the case of TURBO BEAR Warrants). The Strike Price resulting for each calendar day shall be rounded commercially to two decimal places; the calculation of the respective following Strike Price, however, shall be performed on the basis of the unrounded Strike Price for the preceding day.

The Strike Price on the Issue Date shall correspond to the value stated in paragraph 2.

The respective Strike Price shall in each case be published on the Issuer's website at www.warrants.commerzbank.com.

"Valuation Date"

The Valuation Date shall be the Exercise Date.

If on the Valuation Date the Reference Price of the Index is not determined and published or on the Valuation Date a Market Disruption Event occurs, then the Valuation Date shall be postponed to the next Index Business Day on which the Reference Price of the Index is again determined and published and on which no Market Disruption Event occurs.

If according to the before-mentioned, the Valuation Date is postponed for three consecutive Index Business Days, and if also on such day the Reference Price of the Index is still not determined and published or if a Market Disruption Event occurs or persists on such day, then this day shall be deemed to be the Valuation Date and the Issuer shall estimate the Reference Price of the Index in its reasonable discretion (§ 315 German Civil Code (BGB)), and in consideration of the prevailing market conditions on such day and make a notification thereof in accordance with § 11.

"Underlying" shall be the Dow Jones Industrial AverageSM (ISIN US2605661048) (the "Index"); as determined and published by CME Group Index Services LLC (the "**Index Sponsor**").

- For each series of Warrants the terms "Strike Price on the Issue Date", "Knock-out Level during the first Adjustment Period" and "Interest Rate Adjustment Factor during the first Adjustment Period", shall have the following meaning:

Type	ISIN	Strike Price on the Issue Date	Knock-out Level during the first Adjustment Period	Interest Rate Adjustment Factor during the first Adjustment Period
BULL	DE000CM6XBF7	EUR 10,035.00	EUR 10,200.00	4.0%

§ 3

(OPTION RIGHT, KNOCK-OUT EVENT, EXERCISE, SETTLEMENT)

- .Subject to the occurrence of a Knock-out Event in accordance with paragraph 2. and subject to the occurrence of an Early Termination of the Warrants according to § 4, each Warrant grants to the Warrantholder the right (the "**Option Right**"), to receive upon exercise from the Issuer the payment of the Cash Settlement Amount in accordance with these Terms and Conditions of the Warrants.

The Cash Settlement Amount is the amount expressed in Euro ("**EUR**") (rounded, if necessary, to the next Eurocent (EUR 0.01) with EUR 0.005 rounded upwards) determined in accordance with the following formula:

$(\text{Underlying}_{\text{final}} - \text{Strike Price}) \times \text{Ratio}$ (in the case of TURBO BULL Warrants)

or

$(\text{Strike Price} - \text{Underlying}_{\text{final}}) \times \text{Ratio}$ (in the case of TURBO BEAR Warrants)

where

$\text{Underlying}_{\text{final}} =$ the Reference Price of the Underlying expressed in EUR on the Valuation Date

Strike Price = the Strike Price applicable on the Valuation Date

For the purposes of calculations made in connection with these Terms and Conditions of the Warrants, one point of the Index level shall be equal to EUR 1.00.

2. If during the period from and including the Issue Date to and including the Valuation Date at a time on which no Market Disruption Event occurs at least one intra-day level of the Index as determined and published by the Index Sponsor (including the closing level) is at least once equal to or below the Knock-out Level (in the case of TURBO BULL Warrants) or equal to or above the Knock-out Level (in the case of TURBO BEAR Warrants), the Option Right pursuant to paragraph 1 shall expire and no Cash Settlement Amount shall be payable to the Warrantholder by the Issuer.

If a Knock-out Event occurs, the Knock-out Amount per Warrant (the "**Knock-out Amount**") shall be determined by the Issuer in its reasonable discretion (§ 315 German Civil Code (BGB)) as the fair value of the Warrants at the date as determined by the Issuer in the notification of the termination and may be zero.

The Knock-out Amount shall be published on the Issuer's website at www.warrants.commerzbank.com.

3. Any exercise of Warrants by the Warrantholder shall be carried out in accordance with the provisions of the following paragraphs:
 - (a) Exercise Notice

In order to validly exercise the Option Right with respect to an Exercise Date, the Warrantholder shall not later than on the tenth Payment Business Day prior to the requested Exercise Date

- (i) deliver a written, binding and irrevocable exercise notice (the "**Exercise Notice**") to the Warrant Agent (§ 9) by use of the form available at the Warrant Agent's or by providing all information and statements requested therein. The Warrant Agent shall be authorised to reject notices which do not comply with this form or that do not provide all information and statements requested therein, and any determination by the Warrant Agent as to whether an Exercise Notice is duly completed and in proper form shall be conclusive and binding on the relevant Warrantholder. Notwithstanding this, in the event that any Exercise Notice is subsequently corrected to the satisfaction of the Warrant Agent, it shall be deemed to be a new Exercise Notice, submitted at the time such correction is delivered to the Warrant Agent; and
- (ii) deliver the Warrants to the Warrant Agent either by means of (1) an irrevocable instruction given to the Warrant Agent to withdraw the relevant Warrants from the collective safe custody account, if any, opened with the Warrant Agent, or (2) transferring the relevant Warrants to the account of the Warrant Agent with the Clearing System.

The delivery of an Exercise Notice shall constitute the irrevocable decision of the relevant Warrantholder to exercise the Warrants specified therein. After delivery of such Exercise Notice, such exercising Warrantholder may not otherwise transfer such Warrants. If, notwithstanding this, any Warrantholder transfers or attempts to transfer such Warrants, the Warrantholder will be liable to the Issuer for any loss, costs and expenses suffered or incurred by the Issuer, including, without limitation, those suffered or incurred as a consequence of it having terminated any related hedging operations in reliance on the relevant Exercise Notice and subsequently entering into replacement hedging operations in respect of such Warrants.

(b) Settlement

- (i) The Issuer shall pay or cause to be paid not later than on the fifth Payment Business Day following the Valuation Date the Cash Settlement Amount to the account indicated by the Warrantheader, subject to compliance by the Warrantheader with the exercise procedure as described above.
- (ii) Exercise of the Warrants and payments by the Issuer will be subject in all cases to any applicable fiscal or other laws, regulations and practices in force at the relevant time. However, the Issuer shall not incur any liability whatsoever in the future if it is unable to pay the Cash Settlement Amount, after using reasonable effort, as a result of such laws, regulations and practices. The Issuer shall not under any circumstances be liable for any acts or default of any clearing system in the performance of its duties in relation to the Warrants.
- (iii) All taxes duties or other charges in connection with the exercise of the Warrants are to be borne and paid by the Warrantheaders. Any additional cost arising from the exercise of the Warrants shall not be borne by the Issuer.

§ 4

(ORDINARY TERMINATION BY THE ISSUER)

1. The Issuer shall be entitled to terminate the Warrants in whole but not in part with respect to each last Payment Business Day in the months of December of each year (each of such dates an "**Ordinary Termination Date**") (the "**Ordinary Termination**"). The first Ordinary Termination Date shall be 31 December 2010.
2. Any such Ordinary Termination must be announced at least 28 days prior to the Ordinary Termination Date in accordance with § 11. Such announcement shall be irrevocable and must state the Ordinary Termination Date.
3. In the case of an Ordinary Termination of the Warrants each Warrantheader shall receive a payment per Warrant as determined in accordance with the provisions of § 3 paragraph 1. The Valuation Date shall be the fifth Payment Business Day prior to the respective Ordinary Termination Date.
4. Any amounts that are payable pursuant to these terms and conditions in the case of Ordinary Termination shall be paid to the Paying Agent subject to the provision that the Paying Agent transfer such amounts to the Clearing System for the purposes of crediting the accounts of the relevant depository banks and forwarding on to the Warrantheaders.
5. Upon notification of the Ordinary Termination of the Warrants the right to the Warrantheader to exercise the Warrants in accordance with § 4 shall expire.

§ 5

2. Such adjustment shall become effective on the date on which the occurrence of the Adjustment Event with respect to the Index Share has its effect on the price of the Index.
