$$\mathbf{Value}_t = \text{Max} \left\{ \frac{1}{\text{Parity}_t} \times \frac{\text{Brent}_t}{\text{Fx}} - C_{t-1} - \text{QF}_{t-1}; 0 \right\}$$

Where:

Brent_t means the Commodity Reference Price available on each Pricing Date_t (i.e. **Brent₀** = USD 83.54);

Parity_t is the Parity applicable on each Calendar Day_t (i.e. **Parity₀** shall be equal to 1);

On each Calendar Day_t, the commission will be equal to the commission rate (“**CR_t**”) multiplied by the value of the Certificate (“**Value_t**”).

Where:

CR_t means the commission rate on each Calendar Day_t and is initially equal to 0.50% per annum. This percentage may be revised with a maximum rate per annum of 0.50%, at the sole discretion of the Calculation Agent, and published by the Issuer, on its website www.produitsdebourse.bnpparibas.com or such other website of the Issuer as may be notified to the Holders, subject to technical problems, during normal business hours on any day (other than a Saturday or a Sunday) on which commercial banks are open for general business in Paris during the entire life of the Certificates.

The level of Quanto Fees will be published by the Issuer, on its website www.produitsdebourse.bnpparibas.com or such other website as the Issuer may notify to the Holders, subject to technical problems, during normal business hours on any day (other than a Saturday or a Sunday) on which commercial banks are open for general business in Paris during the entire life of the Certificates,

PARITY

Parity is the number of Certificates linked to one (1) Underlying, as set out in “Specific Provisions for each Series”, which will be adjusted on each roll date (“**Roll Date_n**”) according to the following formula:

Where:

Parity_{n-1} is the Parity as determined by the Calculation Agent on **Roll Date_{n-1}**;

NFC_a is the arithmetic average of the prices of the Next Futures Contract as calculated by the Calculation Agent to roll its hedging transactions plus the corresponding Roll Fees (“RF”);

CFC_a is the arithmetic average of the prices of the Current Futures Contract as calculated by the Calculation Agent to roll its hedging transactions less the corresponding Roll Fees (“RF”);

RF (“Roll Fees”) is a percentage determined by the Calculation Agent in its sole discretion on each **Roll Date_n**, which may vary between 0.00% and 0.10% (maximum). The level of the Roll Fees will be published by the Issuer, subject to technical problems during normal business hours on any day (other than a Saturday or a Sunday) on which commercial banks are open for general business in Paris during the term of the Certificates, on its website www.produitsdeborse.bnpparibas.com, or such other website of the Issuer as may be notified to the Holders;
