All data as of 06 September 2005, Sources: Bloomberg, Tompson, Standard&Poor's

The India ADR/GDR Index Components will be initially equally weighted (each Share Company at 10%) in the India ADR/GDR Index based on the Price of the India ADR/GDR Index Components on the Index Launch Date.

The India ADR/GDR Index shall comprise at any time of at least seven Qualifying Share Companies ("**Minimum Number of India ADR/GDR Index Components**") and ceases to exist if there are less than seven Qualifying Share Companies eligible.

4. India ADR/GDR Index Selection Criteria ("IISC")

To qualify for inclusion in the India ADR/GDR Index, a Share Company must meet the following selection criteria, together referred to as the "IISC":

- (i) The Share Company must be a India ADR/GDR Related Company which is included in either (i) the India ADR/GDR Index on the Index Launch Date, or (ii) the India ADR/GDR Universe;

and

- (ii) At the date of selection
- the Share Company must have a minimum total market capitalisation of min. USD 100,000,000 or the equivalent amount in another currency calculated by applying the Exchange Rate as published on the respective Bloomberg page <Bloomberg Code Equity DES>;
 - the Share Company must show a 3 Month ADV of minimum USD 1,000,000.

If any of the above mentioned data provider pages are not available, the Index Calculator shall take the data from a page replacing the stated page or if no replacement page is available from any other data provider as selected at the reasonable discretion of the Index Calculator;

and

- (iii). Only Share Companies where their respective ADR's are listed in New York or GDRs listed in London will be considered. Companies listed without ADRs listed in New York or GDRs listed in London will not qualify as India ADR/GDR Index Components.

and

- (iv). The inclusion of a New Share into the India ADR/GDR Index is subject to Technical Constraints.

5. India ADR/GDR Index Composition and Method of Calculation

The value of the India ADR/GDR Index ("**Index Value**") will be calculated and published by the Index Calculator on every Business Day t, subject to a Market Disruption Event, according to the following formula:

$$\text{Index Value}_t = \sum_{i=1}^N (\text{Number of Shares})_{i,t} \times (\text{Price})_{i,t}$$

If, in the determination of the Index Calculator, a Market Disruption Event has occurred on any Business Day, the Index will be calculated and published by the Index Calculator on the first succeeding Business Day, on which the Calculation Agent determines that there is no Market Disruption Event, unless the Index Calculator determines that there is a Market Disruption Event occurring on each of the five Business Days immediately following the original Business Day on which (but for the Market Disruption Event) the Index would have been calculated and published by the Index Calculator. In that case (regardless of the Market Disruption Event) the Index Calculator shall determine the Price of the Share affected by the Market Disruption and the Index Value having regard to the then prevailing market conditions, the last reported trading price of the respective India ADR/GDRs Index Components and such other factors as the Index Calculator determines to be relevant.

Distributions are reinvested proportionally according to each Shares' weight in the Index. The India ADR/GDR Index will then be calculated as follows, for all Shares i , ($i = 1, \dots, N$)

$$\text{Number of Shares}_{i,ex} = \text{Number of Shares}_i \times [1 + D_j * \text{Number of Shares}_j / \text{Index Value}_{ex}]$$

whereby

Number of Shares _{i,ex} = Number of Shares of the i th share following the ex-date;

D_j = Distributions of the j th share net of applicable withholding taxes at a rate adjusted by application of the United Kingdom tax treaty and without reference to tax credits.

Index Value _{ex} = Index Value as defined above, but using the ex-dividend price of the j th Share.

6. Annual Re-weighting of the India ADR/GDR Index

The India ADR/GDR Index shall be re-weighted on each Re-weighting Date. The Existing Shares shall be weighted equally with effect from the Re-weighting Date.

The basis for the re-weighting shall be the Prices of the Shares from the Re-weighting Date taking into account the Exchange Rate if not already expressed in the Settlement Currency.

$$(\text{Index Value})_{\text{before rebalance}} = (\text{Index Value})_{\text{after rebalance}}$$

If, in the determination of the Index Calculator, a Market Disruption Event has occurred on any Re-weighting Date, the Re-weighting shall be postponed to the first succeeding Trading Day on which the Calculation Agent determines that there is no Market Disruption Event, unless the Index Calculator determines that there is a Market Disruption Event occurring on each of the five Trading Days immediately following the original date which (but for the Market Disruption Event) would have been a Re-weighting Date. In that case (i) the fifth Trading Day shall be deemed to be the Re-weighting Date (regardless of the Market Disruption Event); and (ii) the Index Calculator shall determine the Price of the Share affected by the Market Disruption and the Index Value having regard to the then prevailing market conditions, the last reported trading price of the respective India ADR/GDRs Index Components and such other factors as the Index Calculator determines to be relevant.

On the Index Launch Date the Initial India ADR/GDR Index Value will be USD 100.00 ("**Initial Index Value**").

If on an annual Re-weighting Date following the substitution, if any, the number of India ADR/GDR Index Components is below the Target Number ("**Increase Event**"), the number of the India ADR/GDR Index Components maybe increased up to the Target Number according to the IISC.

7. India ADR/GDR Reserve Universe and Selection Criteria

The India ADR/GDR Reserve Universe will comprise Qualifying Share Companies (each a “**India ADR/GDR Reserve Universe Component**” and together the “**India ADR/GDR Reserve Universe Components**”) selected out of the Index Calculator’s stock database comprising more than 10,000 stocks covering 75 countries.

The India ADR/GDR Reserve Universe contains Qualifying Shares which are not Index Components, ranked after their total market capitalisation in USD or the equivalent amount in another currency calculated by applying the Exchange Rate using the under 4. (ii) mentioned data provider and data provider pages. The India ADR/GDR Reserve Universe Component with the highest total market capitalisation in USD or the equivalent amount in another currency calculated by applying the Exchange Rate is ranked No. 1.

8. India ADR/GDR Index Component Substitution

The Index Calculator will determine if all India ADR/GDR Index Components still qualify as Qualified Share Companies on every Trading Day. If a Substitution Event occurs, the affected India ADR/GDR Index Component shall be substituted by a India ADR/GDR Reserve Universe Component on the Substitution Date, subject to a Market Disruption Event.

The Index Calculator shall substitute for such relevant outgoing Share a New Share with effect from the Substitution Date according to the following:

- (i) The next eligible Qualifying Share of the India ADR/GDR Reserve Universe in the order of the highest total market capitalisation in USD with a minimum of USD 100,000,000 or the equivalent amount in another currency calculated by applying the Exchange Rate on the relevant Substitution Date shall substitute the removed Share;
- (ii) If no Qualifying Share exists the Index Component value of such outgoing Share will be notionally invested pro rata in the remaining Index Components.
- (iii) Shares removed from the India ADR/GDR Index shall be included in the India ADR/GDR Reserve Universe;

The basis for the substitution shall be the respective Transaction Prices of the Trading Day preceding the relevant Substitution Date.

If, in the determination of the Index Calculator, a Market Disruption Event has occurred on any Substitution Date, the Substitution shall be postponed to the first succeeding Trading Day on which the Calculation Agent determines that there is no Market Disruption Event, unless the Index Calculator determines that there is a Market Disruption Event occurring on each of the five Trading Days immediately following the original date which (but for the Market Disruption Event) would have been a Re-Substitution Date. In that case (i) the fifth Trading Day shall be deemed to be the Substitution Date (regardless of the Market Disruption Event); and (ii) the Index Calculator shall determine the Price of the Share affected by the Market Disruption and the Index Value having regard to the then prevailing market conditions, the last reported trading price of the respective India ADR/GDRs Index Components and such other factors as the Index Calculator determines to be relevant.

9. Increase of the Number of India ADR/GDR Index Components

If, on an Annual Re-weighting Date, the number of Qualifying Share Companies in the India ADR/GDR Reserve Universe exceeds the number of Share Companies to be notionally removed from the India ADR/GDR Index according to the IISC (“**Increase Event**”), the number of India ADR/GDR Index Components may be increased up to a limit of 10 by including the next eligible Qualifying Share Companies being comprised in the India ADR/GDR Reserve Universe. Hereby the following applies:

- (i) The Increase Share Amount will be invested in each New Share to be included in the India ADR/GDR Index;
- (ii) For those Existing Shares whose Share Value exceeds the respective Increase Share Amount its Share Value shall be decreased by the respective Excess Amount;
- (iii) For those Existing Shares whose Share Value is less than the respective Increase Share Amount its Share Value shall be increased by the respective Shortfall Amount.

10. Publication of the India ADR/GDR Index

The daily prices of the India ADR/GDR Index will be published on Bloomberg page [RBSZNDIA] and on Reuters page [.RBSZNDIA].
