## INFORMATION ON THE UNDERLYING

Performance of Underlying/formula/ other variable, explanation of effect on value of investment and associated risks and other information concerning the Underlying:

**General:** Fluctuations in the value of the Underlying will have an effect on the value of the Securities throughout the life of the Securities and at maturity/expiration. The value of the Underlying may go down or up throughout the life of the Securities.

**Automatic Termination:** If the value or performance of the Underlying on any date meets certain specified conditions, it will affect the value of the Securities, and will potentially lead to the automatic termination of the Securities.

**Negative Correlation:** All other things being equal, negative performance of the Underlying will have a positive effect on the value of the Securities at maturity/expiration, and positive performance of the Underlying will have a negative effect on the value of the Securities at maturity/expiration.

**Leverage:** All other things being equal, positive or negative changes in the performance of the Underlying will have a

proportionately larger effect on the value of the Securities, and therefore leverage has the potential to magnify gains or losses of the Securities.

**No Capital Protection:** All other things being equal, the value or performance of the Underlying will affect the value of the Securities at maturity/expiration, to such an extent that the value of the Securities at maturity/expiration may be zero.

**Futures Contracts:** Futures contracts have fixed expiration dates and upon expiration they are rolled into new futures contracts with a later maturity date. The purchase price of the new futures contracts may be more, or less, than the expiration price of the expiring futures contracts. This means that the Securities may then be linked to fewer, or more, futures contracts than before the expiration of the old futures contracts. When linked to a smaller number of futures contracts, the performance of the Underlying will have a proportionately smaller effect on the value of the Securities at maturity/expiration. Conversely, when linked to a larger number of futures contracts, the performance of the Underlying will have a proportionately larger effect on the value of the Securities at maturity/expiration.

## **No SIGNIFICANT CHANGE AND No MATERIAL ADVERSE CHANGE**

There has been no significant change in the financial position of the Issuer Group taken as a whole since 30 June 2011 (the end of the last financial period for which the latest interim financial information has been published).

Save in relation to (i) matters referred to on page 119 of the 2011 Annual Results of RBSG, relating to Payment Protection Insurance, in respect of which the Issuer Group has made provisions for therein; and (ii) the effect on revenues of Global Banking and Markets of the current subdued operating environment (see pages 49 to 52 of the 2011 Annual Results of RBSG), there has been no material adverse change in the prospects of the Issuer Group taken as a whole since 31 December 2010 (the last date to which the latest audited published financial information of the Issuer Group was prepared).

## **RESPONSIBILITY**

The Issuer accepts responsibility for the information contained in the Base Prospectus, as completed and/or amended by these Final Terms. To the best of the knowledge and belief of the Issuer (which has taken all reasonable care to ensure that such is the case) the information contained in this Base Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information. Material changes since the date of the Base Prospectus will trigger the need for a supplement under Article 16 of Directive 2003/71/EC which will be filed with both the AFM and the SIX Swiss Exchange.
