7. **PERFORMANCE OF INDEX/FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT AND ASSOCIATED RISKS** (*Structured Notes only*)

Under these Notes, the Noteholders are entitled to receive indexed coupons totally linked to the performance of the Underlying(s) calculated on annual Valuation Dates, on the basis of its initial level. At maturity, the Noteholders are entitled to receive an amount totally linked to the performance of the Underlying(s). The actual redemption date of these Notes is directly related to the performance of the Underlying(s): the better the performance, the sooner the redemption date and conversely, the worse the performance and the later the redemption date. The return depends upon the fact that the performance of the Underlying(s) reaches or does not reach a pre-determined threshold. Accordingly, a small downward or upward movement of the Underlying(s) close to the threshold may result in a significantly larger increase or decrease of the return of the Notes. The return of these Notes is linked to the performances of the Underlying(s) as calculated on pre-determined Valuation Dates, and regardless of the level of such Underlying(s) between these dates. As a result, the Closing Price of the Underlying(s) on these dates will affect the value of the Notes more than any other single factor. Under these Notes, at maturity, the Noteholders may not receive the amount initially invested. Noteholders are entitled to receive a Final Redemption Amount which may, in case of an adverse evolution of the Underlying(s) during the term of the Notes, be significantly lower than the amount per Note initially invested.

The Notes may be redeemed early in the event that the outstanding aggregate nominal amount is reduced to or falls below 10% of the initial aggregate nominal amount of such Notes.

In such event the Issuer will have the option to redeem any outstanding Notes early upon giving not less than 15 Business Days notice. This could lead to investors receiving an amount at redemption earlier than had been anticipated in circumstances over which the investors have no control and may affect the value of their investment.

C15	How the value of the investment is affected by the value of the underlying instrument(s), unless the securities have a denomination of at least EUR 100,000.	Under these Notes, the Noteholders are entitled to receive indexed coupons totally linked to the performance of the Underlying(s) calculated on annual Valuation Dates, on the basis of its initial level. At maturity, the Noteholders are entitled to receive an amount totally linked to the performance of the Underlying(s). The actual redemption date of these Notes is directly related to the performance of the Underlying(s): the better the performance, the sooner the redemption date and conversely, the worse the performance and the later the redemption date. The return depends upon the fact that the performance of the Underlying(s) reaches or does not reach a pre-determined threshold. Accordingly, a small downward or upward movement of the Underlying(s) close to the threshold may result in a significantly larger increase or decrease of the return of the Notes. The return of these Notes is linked to the performances of the Underlying(s) as calculated on pre-determined Valuation Dates, and regardless of the level of such Underlying(s) between these dates. As a result, the Closing Price of the Underlying(s) on these dates will affect the value of the Notes more than any other single factor. Under these Notes, at maturity, the Noteholders may not receive the amount initially invested. Noteholders are entitled to receive a Final Redemption Amount which may, in case of an adverse evolution of the Underlying(s) during the term of the Notes, be significantly lower than the amount per Note initially invested.

C17	Settlement procedure of the derivative securities	Cash delivery or Physical Delivery								
C18	How the return on derivative securities takes place	<p>Pursuant to the provisions of the Additional Terms and Conditions relating to the underlying asset(s) and upon the occurrence of certain extraordinary events and adjustments affecting such underlying asset(s), the Calculation Agent may decide an early redemption of the Notes on the basis of the Market Value</p> <p>The Notes will be early redeemed automatically upon the occurrence of a trigger event and the Automatic Early Redemption Amount shall be equal to Specified Denomination multiplied by the applicable formula.</p>								
C19	Exercise price or final reference price of the underlying	Final reference price: the value of the underlying asset(s) on the relevant valuation date(s) for the redemption, subject to the occurrence of certain extraordinary events and adjustments affecting such underlying asset(s).

Section D – Risks		
D2	Key information on the key risks that are specific to the Issuer	<p>The Group is exposed to the risks inherent in its core businesses</p> <p>The Group's risk management focuses on the following main categories of risks, any of which could materially adversely affect the Group's business, results of operations and financial condition:</p> <p>Credit and counterparty risk (including country risk): risk of losses arising from the inability of the Group's customers, issuers or other counterparties to meet their financial commitments. Credit risk includes counterparty risk linked to market transactions (replacement risk) and as well as securitisation activities.</p> <p>Market risk: risk of a loss of value on financial instruments arising from changes in market parameters, volatility of these parameters and correlations between them.</p> <p>Operational risks: risk of losses or sanctions due to inadequacies or failures in internal procedures or systems, human error or external events;</p> <p>Structural interest and exchange rate risk: risk of loss or of write-downs in the Group's assets arising from variations in interest or exchange rates.</p> <p>Liquidity risk: risk of the Group not being able to meet its cash or collateral requirements as they arise and at a reasonable cost.</p> <p>The Guarantee constitutes a general and unsecured contractual obligation of the Guarantor and no other person, any payments on the Notes are also dependent on the creditworthiness of the Guarantor.</p> <p>Prospective investors in Notes benefiting from the Guarantee should note that the entitlement of the Noteholder will be limited to the sums obtained by making a claim under the Guarantee, and the relevant provisions of the Guarantee and, in relation to Secured Notes only, from the sums obtained following enforcement of the relevant Pledge Agreement.</p> <p>The Guarantee is a payment guarantee only and not a guarantee of the performance by the relevant Issuer or any of its other obligations under the Notes benefiting from the Guarantee.</p> <p>The Guarantee may cover only part of the relevant Issuer's payment obligations under the relevant Series of Notes. In such a case, Noteholders may retain the risk that payments under the Notes are less than the amounts due by the Issuer under the Notes.</p> <p>Société Générale will act as issuer under the Programme, as the Guarantor of the Notes issued by SG Issuer, SGA Société Générale Acceptance N.V. and SG Option Europe and also as provider of hedging instruments to each Issuer. As a result, investors will be exposed not only to the credit risk of the Guarantor but also operational risks arising from the lack of independence of the Guarantor, in</p>

		<p>assuming its duties and obligations as the Guarantor and provider of the hedging instruments.</p> <p>The potential conflicts of interests and operational risks arising from such lack of independence are in part intended to be mitigated by the fact that different divisions within the Guarantor will be responsible for implementing the Guarantee and providing the hedging instruments and that each division is run as a separate operational unit, segregated by Chinese walls (information barriers) and run by different management teams.</p> <p>The Issuers and the Guarantor and any of their subsidiaries and/or their affiliates, in connection with their other business activities, may possess or acquire material information about the underlying assets. Such activities and information may cause consequences adverse to Noteholders.</p> <p>The Issuers and the Guarantor and any of their subsidiaries and/or their affiliates may act in other capacities with regard to the Notes, such as market maker, calculation agent or agent. Therefore, a potential conflict of interests may arise.</p> <p>In connection with the offering of the Notes, the Issuers and the Guarantor and/or their affiliates may enter into one or more hedging transaction(s) with respect to a reference asset(s) or related derivatives, which may affect the market price, liquidity or value of the Notes.</p>
D3	Key information on the key risks that are specific to the securities	<ul style="list-style-type: none"> • In the case of Open End Notes, the duration of the Notes is dependent on an optional redemption, if any, elected by the Issuer. If there is no secondary market, there might be no possibility for the investors to sell the Notes. • The possibility of an optional redemption by the Issuer is likely to limit the market value of the Notes. Furthermore regarding the possibility of an optional redemption by the Issuer potential investors should consider reinvestment risk in light of other investments available at that time. • The Notes may provide for an automatic early redemption linked to a specific event. Therefore, the Noteholder will not participate in any future performance of the underlying. • Payments (whether in respect of principal and/or interest and whether at maturity or otherwise) on Structured Notes are calculated by reference to certain underlyings, the return of the Notes is based on changes in the value of the underlying, which may fluctuate. Potential investors should be aware that these Notes may be volatile and that they may receive no interest and may lose all or a substantial portion of their principal. A holder of Dual Currency Notes is exposed to the risk of changes in currency exchange rates which, if such changes result in losses, may affect the yield of the Notes. • Failure to pay any subsequent part payments in respect of partly-paid Notes could result in an investor losing some or all of his investment. • Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes. • Notes with variable interest rates can be volatile investments. This volatility may be further enhanced if they are structured to include multipliers or

		<p>other leverage factors.</p> <ul style="list-style-type: none"> • Inverse Floating Rate Notes are more volatile because an increase in the reference rate not only decreases the interest rate of the Notes, but may also reflect an increase in prevailing interest rates, which further adversely affects the market value of these Notes. • Structured Notes where the performance of an underlying is multiplied by a certain factor to determine the amounts payable by the Issuer are subject to increased volatility and risks including a total loss of the invested capital. • Changes in market interest rates have a substantially stronger impact on the prices of Zero Coupon Notes than on the prices of ordinary Notes because the discounted issue prices are substantially below par. • Capital protected notes do not necessarily lead to a protection of the invested capital at any given time during the life of the Notes and an inability of the Issuer and/or the Guarantor to meet their obligations may cause a total loss of the capital invested by the investor. • The interest rate or redemption amount of certain Notes may be linked to the occurrence or non-occurrence of certain events which are not connected with the Issuer or the Guarantor, such as credit, price levels, weather or sports events, the occurrence of which is beyond the control of the Issuer and the Guarantor and Noteholders are exposed to the risk of such event occurring or not, as the case may be. • In the event of the Notes providing for a delivery of any underlying asset upon redemption investors shall be required to make certain notifications and take other actions (e. g. to opt for physical delivery and giving an irrevocable notice). The delivery of such underlying asset will be subject to all applicable laws, regulations and practices and the Issuer shall not incur any liability whatsoever if it is unable to deliver or procure the delivery of such underlying to the relevant holder of the Notes because of any such laws, regulations or practices. Each holder of a Note should be aware that if the Notes may be redeemed by physical delivery of the underlying, it shall be deemed to acknowledge its understanding and acceptance of this matter and to have made its own examination and assessment of its capacity and power to receive such underlying and not to have relied on any representation of the Issuer, the Paying Agents, Société Générale as Guarantor or as Calculation Agent under the Notes, or Société Générale's affiliates regarding this matter. • The Terms and Conditions may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Notes may be incurred or certain modifications be made to their terms. Furthermore, an early termination of the Notes by the Issuer may occur upon the occurrence of certain events.
D6	Important warning to the investor	<p>CERTAIN ISSUES OF NOTES MAY NOT BE SUITABLE INVESTMENTS FOR ALL INVESTORS. NO INVESTOR SHOULD PURCHASE A NOTE UNLESS SUCH INVESTOR UNDERSTANDS, AND IS ABLE TO BEAR THE YIELD, MARKET LIQUIDITY, STRUCTURE, REDEMPTION AND OTHER RISKS ASSOCIATED WITH THE NOTE.</p> <p>INVESTORS COULD SUSTAIN AN ENTIRE LOSS OF THEIR INVESTMENT AND SHOULD THEREFORE REACH AN INVESTMENT DECISION ON THE NOTES ONLY AFTER CAREFUL CONSIDERATION WITH THEIR OWN</p>
