## INFORMATION ON THE UNDERLYING

Performance of Underlying/formula/other variable, explanation of effect on value of investment and associated risks and other information concerning the Underlying:

**General:** Fluctuations in the value of the Underlying will have an effect on the value of the Securities throughout the life of the Securities and at maturity/expiration. The value of the Underlying may go down or up throughout the life of the Securities.

**Automatic Termination:** If the value or performance of the Underlying on any date meets certain specified conditions, it will affect the value of the Securities, and will potentially lead to the automatic termination of the Securities.

**Positive Correlation:** All other things being equal, positive performance of the Underlying will have a positive effect on the value of the Securities at maturity/expiration, and negative performance of the Underlying will have a negative effect on the value of the Securities at maturity/expiration.

**Entitlement Less Than 1:** Any increase in the value or performance of the Underlying will have a lesser effect on the value of the Securities at maturity/expiration than would have been the case if the Securities had been exposed to one unit of the Underlying.

**Leverage:** All other things being equal, positive or negative changes in the performance of the Underlying will have a proportionately larger effect on the value of the Securities, and therefore leverage has the potential to magnify gains or losses of the Securities.

**No Capital Protection:** All other things being equal, the value or performance of the Underlying will affect the value of the Securities at maturity/expiration, to such an extent that the value of the Securities at maturity/expiration may be zero.

## INFORMATION ON THE UNDERLYING

Performance of Underlying/formula/other variable, explanation of effect on value of investment and associated risks and other information concerning the Underlying:

**General:** Fluctuations in the value of the Underlying will have an effect on the value of the Securities throughout the life of the Securities and at maturity/expiration. The value of the Underlying may go down or up throughout the life of the Securities.

**Automatic Termination:** If the value or performance of the Underlying on any date meets certain specified conditions, it will affect the value of the Securities, and will potentially lead to the automatic termination of the Securities.

**Positive Correlation:** All other things being equal, positive performance of the Underlying will have a positive effect on the value of the Securities at maturity/expiration, and negative performance of the Underlying will have a negative effect on the value of the Securities at maturity/expiration.

**Entitlement Less Than 1:** Any increase in the value or performance of the Underlying will have a lesser effect on the value of the Securities at maturity/expiration than would have been the case if the Securities had been exposed to one unit of the Underlying.

**Leverage:** All other things being equal, positive or negative changes in the performance of the Underlying will have a proportionately larger effect on the value of the Securities, and therefore leverage has the potential to magnify gains or losses of the Securities.

**No Capital Protection:** All other things being equal, the value or performance of the Underlying will affect the value of the Securities at maturity/expiration, to such an extent that the value of the Securities at maturity/expiration may be zero.

## INFORMATION ON THE UNDERLYING

Performance of Underlying/formula/other variable, explanation of effect on value of investment and associated risks and other information concerning the Underlying:

**General:** Fluctuations in the value of the Underlying will have an effect on the value of the Securities throughout the life of the Securities and at maturity/expiration. The value of the Underlying may go down or up throughout the life of the Securities.

**Automatic Termination:** If the value or performance of the Underlying on any date meets certain specified conditions, it will affect the value of the Securities, and will potentially lead to the automatic termination of the Securities.

**Positive Correlation:** All other things being equal, positive performance of the Underlying will have a positive effect on the value of the Securities at maturity/expiration, and negative performance of the Underlying will have a negative effect on the value of the Securities at maturity/expiration.

**Entitlement Less Than 1:** Any increase in the value or performance of the Underlying will have a lesser effect on the value of the Securities at maturity/expiration than would have been the case if the Securities had been exposed to one unit of the Underlying.

**Leverage:** All other things being equal, positive or negative changes in the performance of the Underlying will have a proportionately larger effect on the value of the Securities, and therefore leverage has the potential to magnify gains or losses of the Securities.

**No Capital Protection:** All other things being equal, the value or performance of the Underlying will affect the value of the Securities at maturity/expiration, to such an extent that the value of the Securities at maturity/expiration may be zero.

## INFORMATION ON THE UNDERLYING

Performance of Underlying/formula/other variable, explanation of effect on value of investment and associated risks and other information concerning the Underlying:

**General:** Fluctuations in the value of the Underlying will have an effect on the value of the Securities throughout the life of the Securities and at maturity/expiration. The value of the Underlying may go down or up throughout the life of the Securities.

**Automatic Termination:** If the value or performance of the Underlying on any date meets certain specified conditions, it will affect the value of the Securities, and will potentially lead to the automatic termination of the Securities.

**Positive Correlation:** All other things being equal, positive performance of the Underlying will have a positive effect on the value of the Securities at maturity/expiration, and negative performance of the Underlying will have a negative effect on the value of the Securities at maturity/expiration.

**Entitlement Less Than 1:** Any increase in the value or performance of the Underlying will have a lesser effect on the value of the Securities at maturity/expiration than would have been the case if the Securities had been exposed to one unit of the Underlying.

**Leverage:** All other things being equal, positive or negative changes in the performance of the Underlying will have a proportionately larger effect on the value of the Securities, and therefore leverage has the potential to magnify gains or losses of the Securities.

**No Capital Protection:** All other things being equal, the value or performance of the Underlying will affect the value of the Securities at maturity/expiration, to such an extent that the value of the Securities at maturity/expiration may be zero.

## INFORMATION ON THE UNDERLYING

Performance of Underlying/formula/other variable, explanation of effect on value of investment and associated risks and other information concerning the Underlying:

**General:** Fluctuations in the value of the Underlying will have an effect on the value of the Securities throughout the life of the Securities and at maturity/expiration. The value of the Underlying may go down or up throughout the life of the Securities.

**Automatic Termination:** If the value or performance of the Underlying on any date meets certain specified conditions, it will affect the value of the Securities, and will potentially lead to the automatic termination of the Securities.

**Positive Correlation:** All other things being equal, positive performance of the Underlying will have a positive effect on the value of the Securities at maturity/expiration, and negative performance of the Underlying will have a negative effect on the value of the Securities at maturity/expiration.

**Entitlement Less Than 1:** Any increase in the value or performance of the Underlying will have a lesser effect on the value of the Securities at maturity/expiration than would have been the case if the Securities had been exposed to one unit of the Underlying.

**Leverage:** All other things being equal, positive or negative changes in the performance of the Underlying will have a proportionately larger effect on the value of the Securities, and therefore leverage has the potential to magnify gains or losses of the Securities.

**No Capital Protection:** All other things being equal, the value or performance of the Underlying will affect the value of the Securities at maturity/expiration, to such an extent that the value of the Securities at maturity/expiration may be zero.

**FX Adjustment:** The value of the Securities at maturity/expiration will be affected both by the value or performance of the Underlying and by the performance of the relevant FX rate between the currency of the Underlying and the currency of the Securities.
