

Order for a production MBE machine in France

Bezons, April 1st, 2019 - 8:00am - RIBER, a global market leader for semiconductor industry equipment, is announcing an order for a production MBE machine in France.

RIBER received a purchase order for a 412 P system from 3SP Technologies (3SPT) in order to increase 3SPT's production capacity of optoelectronic components.

3SPT, a subsidiary of O-Net Communications, is specialized in the field of fabrication of high-performance laser chips and modules. Those optoelectronic components allow to meet the needs of increasing data rates in optical fiber communication networks and data centers.

The ordered equipment will be delivered by RIBER to 3SPT in 2020.

About RIBER:

Riber designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. This high-tech equipment is essential for the manufacturing of compound semiconductor materials and new materials that are used in numerous consumer applications, from new information technologies to OLED flat screens and next-generation solar cells.

Riber is listed on Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. Riber is eligible for SME share-based savings schemes (PEA-PME).
