¹Data at 100%, irrespective of percentage held. 2019 figures including airport passenger numbers over the full period.

N/S: The comparison with August 2020, during which passenger traffic was extremely low because of the pandemic, is immaterial.

In August 2021, passenger traffic in the VINCI Airports network was down 56.6% compared to August 2019, confirming the recovery observed in July.

In continental Europe – primarily Portugal and France, traffic benefitted from the health pass and positive trends in intra-European tourist markets. In the United Kingdom, conversely, restrictions on foreign travel have prevented any recovery in traffic.

Some American airports –Dominican Republic and Costa Rica– have returned to traffic levels close to those before the health crisis. In Asia, traffic remained very weak in Japan – due to the country closing its borders – and virtually zero in Cambodia, due to travel restrictions imposed by other countries in the region, including China.
