

Inventiva to present at the 40th Annual J.P. Morgan Healthcare Conference

Daix (France), Long Island City (New York), December 16, 2021 – Inventiva (Euronext Paris and Nasdaq: IVA), a clinical-stage biopharmaceutical company focused on the development of oral small molecule therapies for the treatment of non-alcoholic steatohepatitis (NASH), mucopolysaccharidoses (MPS) and other diseases with significant unmet medical need, today announced that Frédéric Cren, Chairman, CEO and cofounder of Inventiva, has been invited to present a corporate overview, followed by a Q&A session, and will engage, with Inventiva’s leadership team, in 1x1 investor meetings at the upcoming 40th Annual J.P. Morgan Annual Healthcare Conference, being held virtually on January 10-13, 2022.

The event details are as follows:

Date:	Thursday, January 13, 2022
Time of the presentation:	11:15 am – 11:35 am (ET) / 5:15 pm – 5:35 pm (CET)
Time of the Q&A session:	11:35 am – 11:55 am (ET) / 5:35 pm – 5:55 pm (CET)
Live and replay link:	Click here
Format:	Virtual event

The link to the event will also be available on Inventiva’s website in the “Investors – Investor Presentations” section.

About Inventiva

Inventiva is a clinical-stage biopharmaceutical company focused on the development of oral small molecule therapies for the treatment of NASH, MPS and other diseases with significant unmet medical need.

Leveraging its expertise and experience in the domain of compounds targeting nuclear receptors, transcription factors and epigenetic modulation, Inventiva is currently advancing two clinical candidates, as well as a deep pipeline of preclinical programs.

Lanifibranor, its lead product candidate, is being developed for the treatment of patients with NASH, a common and progressive chronic liver disease for which there are currently no approved therapies. In 2020, Inventiva announced positive topline data from its Phase IIb clinical trial evaluating lanifibranor for the treatment of patients with NASH and obtained both FDA Breakthrough Therapy and Fast Track designation for lanifibranor in the treatment of NASH. Lanifibranor is currently being evaluated in a pivotal Phase III clinical trial.

The Company has established a strategic collaboration with AbbVie in the area of autoimmune diseases resulting in the discovery of the drug candidate cedirogant (AABV-157), an oral ROR γ inverse agonist. Cedirogant has reached clinical proof of concept during a Phase Ib clinical trial and is currently being evaluated in a Phase IIb clinical trial in patients with moderate to severe chronic plaque psoriasis. This collaboration enables Inventiva to receive payments upon the achievement of pre-clinical, clinical, regulatory and commercial milestones, in addition to royalties on any approved products resulting from this collaboration.

Inventiva is also developing odiparcil, a second clinical stage asset, for the treatment of patients with subtypes of MPS, a group of rare genetic disorders. Inventiva announced positive topline data from its Phase IIa clinical trial evaluating odiparcil for the treatment of adult MPS VI patients in 2019 and received both FDA Fast Track and Rare Paediatric Disease designation for odiparcil in MPS VI.

In parallel, Inventiva is in the process of selecting an oncology development candidate for its Hippo signalling pathway program.

The Company has a scientific team of approximately 70 people with deep expertise in the fields of biology, medicinal and computational chemistry, pharmacokinetics and pharmacology, as well as in clinical development. It also owns an extensive library of approximately 240,000 pharmacologically relevant molecules, approximately 60% of which are proprietary, as well as a wholly-owned research and development facility.

Inventiva is a public company listed on compartment C of the regulated market of Euronext Paris (ticker: IVA - ISIN: FR0013233012) and on the Nasdaq Global Market in the United States (ticker: IVA). www.inventivapharma.com.
