## Order for a Research / Pilot production MBE machine in Asia

**Bezons, January 19, 2022 – 8:00am – RIBER, the global leader for Molecular Beam Epitaxy (MBE) equipment serving the semiconductor industry, is announcing a multi-million Euros order for an automatic MBE system in Asia.**

A Japanese company has ordered an automatic MBE 412 system for the development and production of opto-electronics devices for high-speed optical fiber communication.

The MBE 412 system is the most suitable 4-inches wafer MBE research and pilot production tool on the market for III-V and advanced materials.

This order will be delivered in 2022.

### **About RIBER**

RIBER is the global market leader for MBE - molecular beam epitaxy - equipment. It designs and produces MBE systems and evaporators for the semiconductor industry. It also provides technical and scientific support for its clients, maintaining their equipment and optimizing their performance and output levels. Through its high-tech equipment, RIBER performs an essential role in the development of advanced semiconductor systems that are used in numerous consumer applications, from information technologies to 5G telecommunications networks, OLED screens and next-generation solar cells.

RIBER is a BPI France-approved innovative company and is listed on the Euronext Growth Paris market (ISIN: FR0000075954).
