

## EDF updates its 2022 French nuclear output estimate

As part of its control program on the French nuclear fleet (see 13 January 2022 press release), EDF revises its 2022 nuclear output estimate from 300 – 330 TWh to 295 – 315 TWh.

The 2023 French nuclear output estimate, currently 340 – 370 TWh, will be updated as soon as possible.

### About EDF

As a major player in energy transition, the EDF Group is an integrated energy company active in all businesses: generation, transmission, distribution, energy trading, energy sales and energy services. EDF group is a world leader in low-carbon energy, having developed a diverse production mix based mainly on nuclear and renewable energy (including hydropower). It is also investing in new technologies to support energy transition. EDF's raison d'être is to build a net zero energy future with electricity and innovative solutions and services, to help save the planet and drive well-being and economic development. The Group is involved in supplying energy and services to approximately 37.9 million customers <sup>(1)</sup>, of whom 28.7 million in France <sup>(2)</sup>. It generated consolidated sales of €69.0 billion in 2020. EDF is listed on the Paris Stock Exchange.

<sup>(1)</sup> Since 2018, customers are counted per delivery site. A customer can have two delivery points: one for electricity and another one for gas.

<sup>(2)</sup> Including ÉS (Électricité de Strasbourg).
