## Order for a new production machine in Asia

Bezons, March 8, 2021 – 8:00am – RIBER, a global market leader for molecular beam epitaxy (MBE) equipment serving the semiconductor industry, is announcing an order for a MBE 6000 production system in Asia for a total amount of several million euros.

An industrial client has ordered an additional MBE 6000 system to reinforce the company's existing fleet of reactors intended to produce microwave device material.

With nearly forty machines sold since its launch in 1999, the MBE 6000 is now established as the benchmark MBE system for the mass-production of electronic and optoelectronic device material used in terrestrial telecommunications (4G, 5G) and in fiber optic networks.

This order will be delivered in 2022.

The company will publish its 2021 full-year earnings on April 13, 2022, before start of trading.

## About RIBER

RIBER is the global market leader for MBE - molecular beam epitaxy - equipment. It designs and produces MBE systems and evaporators for the semiconductor industry. It also provides technical and scientific support for its clients, maintaining their equipment and optimizing their performance and output levels. Through its high-tech equipment, RIBER performs an essential role in the development of advanced semiconductor systems that are used in numerous consumer applications, from information technologies to 5G telecommunications networks, OLED screens and next-generation solar cells.

RIBER is a BPI France-approved innovative company and is listed on the Euronext Growth Paris market (ISIN: FR0000075954).
