RECYCLED AGGREGATES

760

JOBS CREATED BY THE
CONSTRUCTION SITE

CONTRACT WORTH:

€255 M

Benefits:

- Key environmental initiatives: recycled aggregates, reusing excavated material, minimisation of water use on the site
- Jobs opportunities for young workers, trainees, First Nations People and people from sectors affected by the COVID-19

Nanterre, 9 May 2022

VINCI to carry out a motorway construction project in Sydney

- Construction of a 7.5km section of the new M12 motorway
- Key environmental construction initiatives
- A AUD 373 million (€255 million) contract

Seymour Whyte, a VINCI Construction subsidiary in Australia, has been selected by the NSW Government to build the central section of the new M12 motorway linking the future Western Sydney International (Nancy-Bird Walton) Airport to the motorway network in the Sydney area. More than 52,000 vehicles a day are expected on this new road infrastructure.

The contract, worth approximately AUD 373 million (€255 million), includes the construction of 7.5km of 2x2 lanes, 11 bridges, cycle and pedestrian paths, networks, Intelligent Transport Systems (ITS) and green spaces.

Seymour Whyte is targeting an "Excellent" sustainability rating from the Australian Infrastructure Sustainability Council, thanks to the reusing or recycling of 95% of the excavated material, 40% of recycled aggregates for the sub-base layers and the minimisation water use on the site.

The construction site, which will create 760 jobs, providing opportunities for young workers, trainees, First Nations People and people from sectors affected by the Covid-19 health crisis.

Work is expected to start by mid-2022 and be completed by the end of 2025 before the opening of Western Sydney International Airport in 2026. Seymour Whyte is also delivering the Western Sydney Airport's landside civil and building works, including the integration of the new M12 motorway and the airport's two metro stations.

About VINCI

VINCI is a global player in concessions, energy and construction businesses, employing more than 260,000 people in some 100 countries. We design, finance, build and operate infrastructure and facilities that help improve daily life and mobility for all. Because we believe in all-round performance, we are committed to operating in an environmentally, socially responsible and ethical manner. And because our projects are in the public interest, we consider that reaching out to all our stakeholders and engaging in dialogue with them is essential in the conduct of our business activities. Based on that approach, VINCI's ambition is to create long-term value for its customers, shareholders, employees, partners and society in general. www.vinci.com
