All you need. With love.

The Group's performance in the first quarter was driven by the Enterprises division, where all areas showed growth compared to last year.

The Local Authorities Division reported a decline in activity. It was impacted by the reduction in spending by local authorities as a result of the inflationary context and rising costs that affect their business.

Given the current inflationary and uncertain context, the Group will devote its best efforts to mitigating any impacts. The Group will maintain the implementation of its development strategy, focusing on the expansion of the responsible offer, storage capacities, as well as on the strengthening of the business model combining digital, personalized omnichannel customer approach and the necessary operational agility.
