Commissioning of the Montclar solar farm

Voltalia (Euronext Paris, ISIN code: FR0011995588), an international player in renewable energies, announces the start of production of the Montclar solar farm, located in the commune of the same name in the Alpes de Haute Provence department in South Region.

The 3.7-megawatt Montclar power station, installed over an area of 4.2 hectares, comprises around 8,400 solar panels. It will supply the equivalent of the annual consumption of more than 2,500 inhabitants with green energy. The solar farm benefits from one of the best solar deposits in the country.

Construction was a challenge, as the site is located in a mountainous landscape with steep slopes at an altitude of 1,350 metres. The commune is famous for its ski area, in one of the only self-managed resorts in France.

Next on the agenda: **Q4 2023 turnover**, on January 31, 2024 (after market close)
