

## **SPINEWAY partners with the Société Française de Chirurgie du Rachis (SFCR) Congress in Montpellier, France**

The SpineWay Group, a specialist in innovative implants for the treatment of severe spine disorders, announces that it will be a partner of the Société Française de Chirurgie du Rachis (SFCR) Congress, one of the most important spine surgery events in France. The new edition will be held from June 13 to 15, 2024 at the Corum in Montpellier.

For the tenth consecutive year, SpineWay will present its product ranges to the attending surgeons and spine professionals, including the VEOS/KAPHORN platform for posterior arthrodesis, ESP prostheses (cervical and lumbar) for total disc replacement, and ACIFBOX cages for anterior cervical arthrodesis.

Each year, this unmissable event attracts more than 400 participants and allows manufacturers to showcase their instruments and present their new technologies in the field of spinal surgery. This annual event allows SpineWay to strengthen its relationships with surgeons who use its products and to initiate new ones. It is also a mean of consolidating the Group's positions with its commercial partners in France, where sales have been growing steadily since the integration of Spine Innovations and Distimp. In addition, as in the previous year, the Group's "Silver Sponsor" status will give it a prime position with the congress participants, through a highly visible exhibition space, a full-page advertisement in the event program and the distribution of SpineWay documentation to all participants.

***The surge in sales in France establishes SpineWay as one of the key players in the sector and reinforces its aim of becoming a major player in less invasive spine treatments in Europe.***
