The Spineway Group, a specialist in innovative implants for the treatment of severe spine disorders, recorded an excellent third quarter in 2024, with revenue of €2.6 million, representing purely organic growth (excluding change in the scope of consolidation) of 24% compared with the previous year. As a result, nine-month revenue was €9.1 million, an increase of 21% on 2023.

This strong organic growth is being driven by accelerating sales of the new Distimp ranges, which will continue to be rolled out in **Latin America** in 2024. Nine-month revenue in the region totaled €3.2 million, up 42% on the same period last year.

In **Europe**, nine-month revenue came to €4.2 million (+14%), of which €2.3 million in France, which continued its good momentum with growth of 14% over the period. In **Asia**, revenue was €1.3 million, up 9% on 2023.

Spineway is moving ahead on its international registration program to take advantage of the many synergies between its products and its markets. Despite some administrative setbacks leading to delays in obtaining certain registrations, the Group confirms its solid revenue growth. In addition, the marketing initiatives and training sessions carried out in recent months in legacy markets should support the Group’s revenue growth.
