- If during the Observation Period no Stop Loss Event has occurred, the Redemption Amount on the Maturity Date will be calculated as follows:

- (2) The Redemption Amount is subject to adjustments pursuant to the provisions in § 6.

§ 5 intentionally left out

§ 6 (Adjustments, Issuer's Irregular Call Rights)

1. The basis for calculating the Redemption Amount shall be the Reference Asset with its provisions applicable from time to time (the "**Index Concept**"), as developed and continued by the Index Sponsor, as well as the respective method of calculation, determination and publication of the Reference Price by the Index Sponsor. The same shall apply, if during the lifetime of the Certificates, changes are made or occur in respect of the calculation of the Reference Asset, the composition and/or weighting of prices on the basis of which the Reference Asset is calculated, or if other measures are taken, which have an impact on the Index Concept, unless otherwise provided in below provisions.
2. Changes in the calculation of the Reference Asset (including adjustments) or the Index Concept shall not result in an adjustment of the provisions to determine the Redemption Amount, unless the new relevant concept or calculation of the Reference Asset is, as a result of a change (including any adjustment), at the Calculation Agent's reasonable discretion no longer comparable to the previous relevant concept or calculation. When determining the necessity of an adjustment, the Calculation Agent will take into account the adjustment of the Derivatives linked to the Reference Asset actually performed by the Determining Futures Exchange. The Calculation Agent will use reasonable endeavours as to ensure that the economic position of the Certificate Holders remains unchanged to the largest extent possible. Any adjustment will be made by the Calculation Agent taking into account the time to maturity of the Certificates and the latest available price for the Reference Asset. If the Calculation Agent determines that, pursuant to the rules of the Determining Futures Exchange, no adjustments are made to the Derivatives linked to the Reference Asset, the terms of the Certificates will regularly remain unchanged. The method to determine the Redemption Amount may also be adjusted if the calculation or publication of the Reference Asset is cancelled or replaced by another Reference Asset. The adjusted method to determine the Redemption Amount and the time of its initial application shall be published in accordance with § 13.
3. If the calculation or publication of the Reference Asset is at any time cancelled and/or replaced by another Reference Asset the Calculation Agent shall, in its reasonable discretion, stipulate which

Reference Asset should in future be used as the basis for the calculation of the Redemption Amount (the "**Replacement Reference Asset**"), adjusting, if applicable, the method or formula to calculate the Redemption Amount accordingly. The Replacement Reference Asset and the time that it is first applied shall be published in accordance with § 13. Commencing with the first application of the Replacement Reference Asset, any reference to the Reference Asset in these Terms and Conditions, depending on the context, shall be read as a reference to the Replacement Reference Asset.

4. If the Reference Asset is no longer determined and published by the Index Sponsor but rather by another person, company or institution (the "**New Index-Sponsor**"), then the Calculation Agent shall have the right to calculate the Redemption Amount on the basis of the Reference Asset as calculated and published by the New Index-Sponsor. In this case, any reference to the Index Sponsor contained herein shall, depending on the context, be deemed as referring to the New Index-Sponsor. If the Reference Asset is no longer calculated by the Index Sponsor but rather by another person, company or institution (the "**New Index-Calculation Agent**"), then the Calculation Agent shall have the right to calculate the Redemption Amount on the basis of the Reference Asset as calculated by the New Index-Calculation Agent. In this case, any reference to the Index Calculation Agent contained herein shall, depending on the context, be deemed as referring to the New Index-Calculation Agent.
5. Should the Calculation Agent come to the conclusion that no reasonable adjustment is possible to account for the change in the method of determination of the Reference Price or should, in the determination of the Calculation Agent, no Replacement Reference Asset be available, the Issuer is entitled to terminate the Certificates early by giving notice pursuant to § 13. Such termination shall become effective at the time of the announcement pursuant to § 13 or, as the case may be, at the time indicated in the announcement. In that case, the Calculation Agent shall within ten Banking Days after the termination determine and publish the reasonable market value of the Certificates (the "**Cancellation Amount**"). The Cancellation Amount will be paid within ten Banking Days after its determination to the Clearing System or to its order with the instruction for immediate forwarding to the Certificate Holders.

§ 7 (Market Disruptions)

1. If a Market Disruption occurs on an observation date, the respective observation date will be postponed to the next following Calculation Date on which the Market Disruption no longer exists. Any payment date relating to such observation date shall be postponed accordingly if applicable.
2. Should the Market Disruption continue for more than 30 consecutive Banking Days, the Issuer, in its sole and absolute discretion shall determine, or cause the Calculation Agent to determine, the Reference Price. The Reference Price required for the determination of the Redemption Amount shall be determined, taking into account the economic position of the Certificate Holders.

However, if within these 30 Banking Days comparable Derivatives expire and are paid on the Determining Futures Exchange, the settlement price established by the Determining Futures Exchange for the comparable Derivatives will be taken into account in calculating the Redemption Amount. In that case, the expiration date for comparable Derivatives will be taken as the relevant observation date.

3. "**Market Disruption**" means:
 - a) in general the suspension or restriction of trading on the exchanges or the markets on which the securities that form the basis of the Reference Asset are listed or traded, or on the respective Futures Exchanges on which Derivatives on the Reference Asset are listed or traded,
 - b) in relation to individual securities which form the basis of the Reference Asset the suspension or restriction of trading on the exchanges or the markets on which such securities are traded or on the respective Futures Exchanges on which Derivatives in such securities are traded, or

- c) the suspension of or failure to calculate the Reference Asset or the non-publication of the calculation as a result of a decision by the Index Sponsor.

A restriction of the trading hours or the number of days on which trading takes place on the Relevant Exchange, or, as the case may be, on the Determining Futures Exchange shall not constitute a Market Disruption provided that the restriction is due to a prior announced change in the rules of the Relevant Exchange or, as the case may be, on the Determining Futures Exchange.

§ 8 (Payments)

1. The Issuer undertakes to pay the Redemption Amount and all amounts owed under these Terms and Conditions in the Specified Currency within five Banking Days following the Stop Loss Event Date or, if applicable, the Maturity Date, or, if applicable, Call Date. All amounts payable shall be rounded up or down to the nearest EUR 0.01, with EUR 0.005 being rounded upwards.
2. If the due date for any payment under the Certificates (the "**Payment Date**") is not a Banking Day, then the Certificate Holders shall not be entitled to payment until the next Banking Day. The Certificate Holders shall not be entitled to further interest or other payment in respect of such delay.
3. All payments shall be made to the Principal Paying Agent (as defined in § 9). The Principal Paying Agent shall pay all amounts due to the Clearing System for credit to the respective accounts of the depository bank for transfer to the Certificate Holders. The payment to the Clearing System shall discharge the Issuer from its payment obligations under the Certificates in the amount of such payment.
4. If the Issuer fails to make any payment under the Certificates when due, interest shall accrue on due amounts on the basis of the default rate of interest established by law. The accrual of interest starts on the original due date (including) and ends at the day (inclusive) immediately preceding the date of payment.

Appendix 3 - Risk Factors

Important Information relating to Risks in connection with the Certificates

These Final Terms are not a substitute for obtaining necessary advice from your bank.

Risk

Please note the following when purchasing Certificates:

- By purchasing Certificates you are entitled to receive the payment of a Redemption Amount linked to the price of the underlying index (the "**Reference Price**") as specified in the Terms and Conditions of the certificates.

Basic Principles

- The Issue Price for Certificates is based on the pricing models used by the Issuer and may include hidden premiums on top of the mathematical value determined using such models. The Issuer will be entitled to determine the amount of any such premium, which may deviate from the premium charged by other issuers for comparable products. These premiums may also include commissions paid to third parties for services relating to derivative securities placement or a respective discount of the Issue Price. They may also result in a reduction of the market price for the securities over time.
- Sole debtor of the Certificate is the Issuer. The Certificate Holder shall only request payments under the Terms and Conditions from the issuer. However, the Certificate Holder assumes the position of a creditor and the credit risk of the Bayerische Hypo- und Vereinsbank AG. The Certificate is not a subordinated, unsecured, contractual liability of the Issuer and afford no immediate rights or participation in respect to the Reference Asset. Should the Issuer get into financial difficulties or become insolvent, could the invested amount – independent from any cumulativeness of the Reference Asset – be partial or completely lost.
- The development of the price for the Certificate is indirectly linked to the performance of the Reference Asset. The market value of the Certificates cannot generally be regarded as a precise reflection of the performance of the Reference Asset since factors such as market expectations and the liquidity of the Reference Assets affect the price development of the Certificates.
- Please note that the purchase of Certificates does not entitle the purchaser to receive on the redemption date a Redemption Amount already fixed today. Any change in the value of the Reference Asset may also lead to the value of the Certificate falling considerably below the price paid for it in line with the performance of the Reference Asset. This may lead to a partial or total loss of the capital you invest (i.e. the price of the Certificate itself, plus any other costs). If the value of the Certificate on the redemption date is less than the purchase price paid for the Certificates, investors will not get back all the money they invested. In such case, the capital loss will be equal to the difference between the purchase price paid for the Certificates and their value on the redemption date.
- If the Issuer liquidates any hedging arrangement for the Certificate issue, this may have a negative impact on the market price of the Reference Asset and therefore also on the value of the Certificates, particularly at the end of the lifetime of the Certificate.
- The value of the Certificates may also be affected by the Issuer's credit rating on the capital market and supply and demand on the secondary market.
- As regards profit expectations, you will have to take any additional costs for the purchase or sale of the Certificates into account.

If, during the term of the Certificate, the market price of the Certificate falls below the purchase price and you feel that the market price will not recover at all before the redemption date, it would be worth considering selling the Certificate and accepting a partial loss to avoid even greater losses. If, contrary to expectations, the market price of the Certificate rises after you have sold it, you may only take advantage of this by repurchasing the Certificate including the payment of any associated costs.

Transactions Excluding or Limiting Risk

Do not assume that you will be able to enter into transactions at any time during the lifetime of the Certificate to exclude or limit the risks to which you are subject. These risks will depend on market factors and associated conditions. It may be the case that such transactions are only available at an unfavourable market price and that you will suffer a corresponding loss in this way.

Financing Transactions in Certificates

If you do decide to go ahead and purchase Certificates, the transaction should be financed using your own surplus funds so that any losses can be borne without difficulty.

If you nonetheless decide to finance the transaction using a loan, please ensure you can meet any interest and redemption payments in the event of a loss being incurred on the transaction. Do not assume that you will be able to finance the loan with any profits made from the Certificate transaction.

If you finance a Certificate transaction by a loan, you will have to set your profit expectations for the transaction at a higher level, since you will have to take both the Certificate acquisition costs and the loan costs (interest, redemption payments, processing fees) into account.

Notice

Prior to the purchase of these Certificates please read the Terms and Conditions together with the Base Prospectus and see a specialist for advice.
