

PRESS RELEASE

loGLOBAL TAPS SES AMERICOM-NEW SKIES SATELLITE TO CONNECT TROOPS IN AFGHANISTAN

Latest agreement leverages long-term relationship
and expands communications with DVB IP platform

SINGAPORE – June 16, 2009 – Leveraging its global satellite fleet to meet growing demand for connectivity everywhere, SES AMERICOM-NEW SKIES, a division of SES S.A. (Euronext Paris and Luxembourg Stock Exchange: SESG), today announced at the CommunicAsia conference that loGlobal has signed a multiyear agreement to create a new DVB IP platform on the NSS-11 satellite to keep NATO troops in Afghanistan connected with friends and family back home.

loGlobal's new Asia 9 platform on the China beam of SES AMERICOM-NEW SKIES' NSS-11 satellite provides more than 70 Mbps of satellite-delivered streaming voice, data and video services to soldiers stationed in and around Kabul, Afghanistan. The solution expands on the growing, long-term relationship between loGlobal and SES AMERICOM-NEW SKIES across three satellites and delivers a broad offering of mission-critical satellite-based services ranging from broadband to video streaming into the South Asian region.

“This latest agreement between loGlobal and SES AMERICOM-NEW SKIES reinforces our service commitment to the Middle East and regions around the world, as the two companies deliver multiple SCPC, VSAT and DVB service platforms over our NSS-703, NSS-6, and NSS-11 spacecraft,” said Deepak Mathur, Vice President of South Asia and the Middle East for SES AMERICOM-NEW SKIES. “loGlobal and its team of dedicated professionals operate in extremely challenging environments and SES AMERICOM-NEW SKIES is proud to play an integral role in enabling loGlobal to meet the vital communications needs of troops serving in Afghanistan.”

About loGlobal

loGlobal is a technology-focused organization addressing RF and satellite ground station design and integration for ISPs, telcos and carriers worldwide. loGlobal Services offers the loStar brand of satellite-based VSAT Internet access solutions in Afghanistan. In the addition, the entity also provides end-to-end engineering and deployment services as and when needed for other companies in the RF and satellite deployment space.

About SES AMERICOM-NEW SKIES

SES AMERICOM-NEW SKIES is the newly combined SES division that brings together SES AMERICOM, the leading supplier of satellite services in the U.S., with the strategic global satellite services of SES NEW SKIES. SES AMERICOM-NEW SKIES is a global leader that serves broadcasters, cable programmers, telecommunications companies and networks, governments, aeronautical and maritime communications integrators, Internet service providers, and educational institutions with efficient communications and content distribution solutions. Recognized as a major innovator of advanced satellite communications services, the division operates a fleet of 25 satellites in key orbital positions capable of providing coverage and service throughout the Americas and around the world. SES AMERICOM-NEW SKIES also has six spacecraft under construction and operates global ground facilities. SES AMERICOM-NEW SKIES has offices in Princeton, The Hague, Washington, D.C., Johannesburg, Sao Paulo, Singapore, and Sydney. For more information, visit www.ses-amicom.com or www.ses-newskies.com.

About SES

SES (Euronext Paris and Luxembourg Stock Exchange: SESG) wholly owns the market-leading satellite operators SES ASTRA and SES AMERICOM-NEW SKIES, 90% of SES SIRIUS in Europe, and strategic participations in Ciel in Canada and QuetzSat in Mexico. SES provides outstanding satellite communications solutions via a global fleet of 40 satellites in 26 orbital locations. For further information: www.ses.com
