PRESS RELEASE

Eramet's response to the Gabonese government's announcement on crude manganese export ban starting in 2029

Eramet takes note of the Gabonese government's intention to ban crude manganese exports from January 1st, 2029. This move is described as part of the country's stated ambition to strengthen its industrial base, initiated by H.E. President Brice Clotaire Oligui Nguema and his Government.

A long-standing partner of Gabon and with over 30 years of presence in the country, Eramet has a track record as a committed investor in Gabon, supporting the country's industrial development ambitions through investing in sustainable mining operations, constructing value-adding transformation facilities and upgrading key infrastructure.

Eramet acknowledges the Government's ambition and, as the main co-shareholder in Comilog, will continue to work with the authorities in a spirit of constructive partnership and mutual respect.

Eramet will remain attentive to this policy shift and will work collaboratively to identify further opportunities for it to contribute to Gabon's economic development in the long term, whilst maintaining the sustainability of its mining and metals operations. In particular, the Group aims to safeguard the strategic role of Comilog and Setrag in being an internationally significant supplier of manganese to the global steel industry — and the 10,460 Gabonese jobs they sustain.

Calendar

30.07.2025: Publication of 2025 half-year results

30.10.2025: Publication of 2025 Group third-quarter turnover

ABOUT ERAMET

Eramet transforms the Earth's mineral resources to provide sustainable and responsible solutions to the growth of the industry and to the challenges of the energy transition.

Its employees are committed to this through their civic and contributory approach in all the countries where the mining and metallurgical group is present.

Manganese, nickel, mineral sands and lithium: Eramet recovers and develops metals that are essential to the construction of a more sustainable world.

As a privileged partner of its industrial clients, the Group contributes to making robust and resistant infrastructures and constructions, more efficient means of mobility, safer health tools and more efficient telecommunications devices.

Fully committed to the era of metals, Eramet's ambition is to become a reference for the responsible transformation of the Earth's mineral resources for living well together.
