

Eurofins completes the divestment of its Electrical & Electronic Testing business to UL Solutions

2 October 2026

Eurofins Scientific SE (the "Company" or "Eurofins") (EUFI.PA) announces the completion of the divestment of its Electrical & Electronic Testing business ("MET Labs") to UL Solutions Inc., which took place on 1 October 2026. The transaction was announced on 14 April 2026 for an Enterprise Value of €575 million on a cash and debt free basis.

MET Labs is an international network of laboratories offering product safety testing, inspection and certification services for electrical and electronics products, with approximately 1,300 staff globally.

The transaction is consistent with Eurofins' focus on allocating capital toward its core testing for life capabilities. Proceeds from the divestment will support the Group's capital allocation priorities, including debt reduction, capital expenditure in laboratories and owned sites, next-generation digital solutions, robotics and AI developments, share buybacks and strategic acquisitions in food, environmental, pharmaceutical, clinical and related testing areas.

Comment from Dr Gilles Martin, Eurofins CEO: "I would like to thank the MET Labs teams for their commitment and expertise, which have built successful and in several cases leading businesses over almost 20 years in the Eurofins network. UL Solutions' focus on applied safety science makes it a natural home for these laboratories, and I wish our former colleagues every success in this next chapter."

About Eurofins – the global leader in bio-analysis

Eurofins is Testing for Life. The Eurofins Scientific SE network of independent companies believes that it is a global leader in food, environment, pharmaceutical and cosmetic product testing and in discovery pharmacology, forensics, advanced material sciences and agrosience contract research services. It is also one of the market leaders in certain testing and laboratory services for genomics, and in the support of clinical studies, as well as in biopharma contract development and manufacturing. It also has a rapidly developing presence in highly specialised and molecular clinical diagnostic testing and in-vitro diagnostic products.

With over 65,000 staff across a decentralised and entrepreneurial network of more than 950 laboratories in over 1,000 companies in 57 countries, Eurofins offers a portfolio of over 200,000 analytical methods to evaluate the safety, identity, composition, authenticity, origin, traceability and purity of a wide range of products, as well as providing innovative clinical diagnostic testing services and in-vitro diagnostic products.

Eurofins companies' broad range of services are important for the health and safety of people and our planet. The ongoing investment to become fully digital and maintain the best network of state-of-the-art laboratories and equipment supports our objective to provide our customers with high-quality services, innovative solutions and accurate results in the best possible turnaround time (TAT). Eurofins companies are well positioned to support clients' increasingly stringent quality and safety standards and the increasing demands of regulatory authorities as well as the evolving requirements of healthcare practitioners around the world.

The Eurofins network has grown very strongly since its inception and its strategy is to continue expanding its technology portfolio and its geographic reach. Through R&D and acquisitions, its companies draw on the latest developments in the field of biotechnology and analytical chemistry to offer their clients unique analytical solutions.
