In addition, the Autorité des marchés financiers invites companies that issue equity securities or securities giving access to equity on a staggered basis over time to include the following standard warning:

Poxel has implemented an equity line in the form of warrants for the subscription of new ordinary shares (*bons de souscription*) with IRIS, which, after receiving the shares issued upon exercise of the Warrants, does not intend to remain a shareholder of the Company. The shares resulting from the exercise of the Warrant will generally be sold on the market within a short period of time, which may create significant downward pressure on the share price. Shareholders may suffer a loss of their invested capital due to a significant decrease in the value of the Company's shares, as well as substantial dilution because of the large number of shares issued in favour of IRIS. Investors are strongly encouraged to exercise caution before deciding to invest in Poxel securities. Investors are invited to review the risks related to this transaction, as described in this press release.
