

PRESS RELEASE

Paris, France - June 3, 2026 at 8:00am CET

Mining Activity for May 2026

- In May 2026, measured in bitcoins, server performance is stable compared to the previous month
- With a Bitcoin price of around US\$74,000, the annualized return for May 2026 is around 11% in a sustained market context
- This yield reinforces CBI's strategy, the objective being to return to an annualized return of 20% thanks to the rise of Bitcoin

Paris, France, June 3, 2026, at 8:00 a.m. CET (CBI, Euronext Growth Paris: FR0014007LWO – ALCBI; OTCQB: CBIPF) – CRYPTO BLOCKCHAIN INDUSTRIES ("CBI") announces that, for the month of May 2026, the yield of mining servers is around 11% annualized for a Bitcoin of around US\$74,000. This result is a testament to the stability and operational efficiency of CBI's mining infrastructure, and reinforces the company's trajectory to progress towards a target annualized return of 20% thanks to Bitcoin's expected rise.

In May 2026, Crypto Blockchain Industries (CBI) kept its Bitcoin mining infrastructure at full operational capacity. The entire fleet, more than 700 operational servers, operated without major interruption, allowing for regular production in line with forecasts. In May, the number of servers under review increased by 20 on average, a figure comparable to April 2026.

Measured in US\$, the annualized return for the month of May 2026 is around 11% for a Bitcoin close to US\$74,000. It is up from March 2026, when the return was around 8% for a Bitcoin in the same price zone. Considering the volatility over the past few days, it is interesting to note that the annualized return over May 2026 would be around 8% for a Bitcoin at \$70,000, and around 16% for a Bitcoin at \$80,000. The objective is to return to an annualized return of 20% thanks to the rise in Bitcoin.

This return is calculated by relating the gross margin generated by the activity (Bitcoins received during the month minus the monthly electricity bill) to the amount invested in the servers, all of which is reduced on an annual basis. The resale price of the servers is not taken into account in these estimates.

This profitability reflects the continuous control of operating costs, the energy efficiency of the infrastructure deployed and the effectiveness of the optimization measures implemented throughout mining operations.

This profitability is also likely to increase or decrease depending on various criteria, including the purchase price of the servers, the price of Bitcoin which directly influences the value of the commissions received, the cost of electricity, as well as the difficulty rate of the Bitcoin network which measures the complexity of mining a block. These annualized return figures are estimated for a given month, based on preliminary electricity billing by Blockware Solutions. If this invoice is subsequently adjusted by Blockware Solutions to take into account the actual consumption, the estimated yield is then adjusted retroactively.

Composition of the portfolio of crypto-assets and similar assets, including mining servers

CBI's portfolio of crypto-assets and related assets recorded a stable performance compared to the previous month, supported by the Bitcoin price of around US\$74,000 and the maintenance of the entire mining server park at full capacity.

The portfolio remains a substantial size, guided by a sustained accumulation objective. It consists mainly of Bitcoins received as part of mining operations, the value of which benefited from the stability of the price in May 2026, in addition to assets directly related to the production infrastructure, in particular the mining servers. It also includes fiat currency reserves that the group plans to deploy in accordance with its capital allocation policy.

Tokens created by CBI itself are not subject to an accounting valuation.

It should be remembered that some listed crypto-assets are held for periods of more than twelve months, as part of a long-term investment strategy, a strategy that is now supported by market dynamics.

May 31, 2026	Quantities	Unit Price	Total Valuation
Main crypto-assets and assimilated			
Bitcoin (*)	24.26	\$73,778	\$1,789,844
Bitcoin (Mining rewards / Server sales)	19.46	\$73,778	\$1,435,729
Bitmain Asics & S21 servers (**)	724	n/a	\$3,855,617

Total valuation (US\$)			\$7,531,927

(*) The price of Bitcoin and all other crypto assets is taken at the close of trading on May 31st 2026. Always includes bitcoins pledged as security for a \$1 million loan.

(**) Amounts invested in S21+, S21 XP, and S21 Hydro servers, net of disposals

(***) Projects in partnership with third parties - Only the CBI share is reflected in this table.

(****) i.e.: 100 million already allocated in full ownership to CBI; 320 million representing CBI's share in the balance of tokens not yet allocated

Warnings

The implementation of CBI projects, as well as their operational budget and financing plan, remain fundamentally subject to significant uncertainties. Failure to meet the underlying assumptions could have a material and negative impact on the value of CBI's assets and liabilities. In addition, investing in crypto-assets carries risks related in particular to their intrinsic volatility, which can affect the financial performance of the CBI. CBI reminds investors that the past performance of crypto-assets is not a guarantee of their future performance. A detailed description of the risks associated with an investment in CBI's securities is available in the Company's financial reports on its website www.cbicorp.io.

About CRYPTO BLOCKCHAIN INDUSTRIES SA

CRYPTO BLOCKCHAIN INDUSTRIES ("CBI") is a French company listed on Euronext Growth (compartment E2) and on OTCQB, whose objective is to build the largest possible portfolio of Bitcoins and other crypto-assets by acquiring them at below-market prices via the ACE strategy: buy mainly Bitcoins on the market (ACQUIRE), develop utility tokens and proprietary digital assets that can be sold in exchange for Bitcoins (CREATE), and acquire Bitcoin at a reduced cost through mining operations (EARN) as part of a long-term strategic partnership with Blockware Solutions, a provider specializing in the infrastructure and hosting of Bitcoin mining operations in the United States.
